

# DIVING EDUCATION + RETAIL CENTER

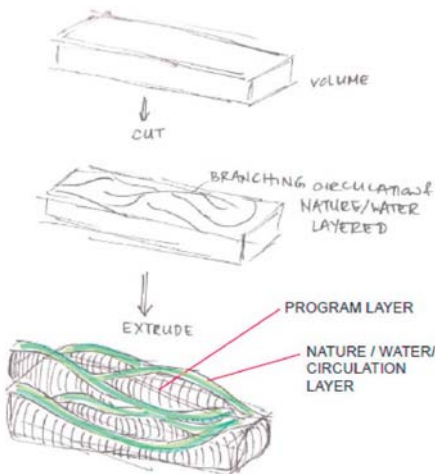

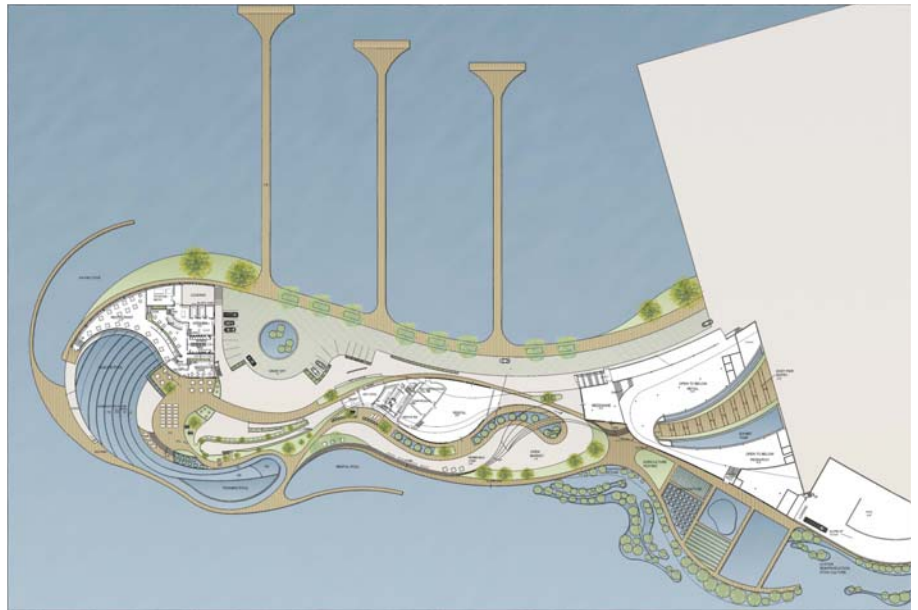

SOZOPOL, BULGARIA

CAP Studio

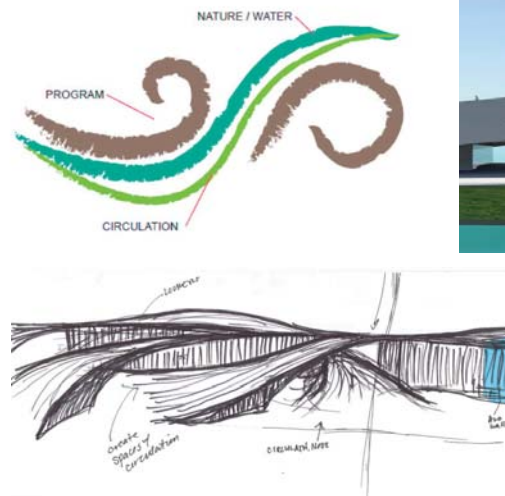

Erich Schoenenberger

Spring 2010

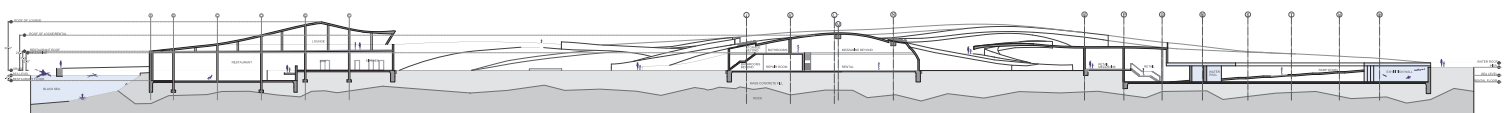

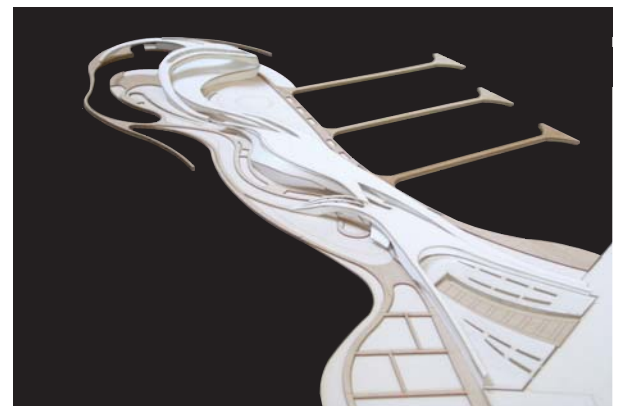

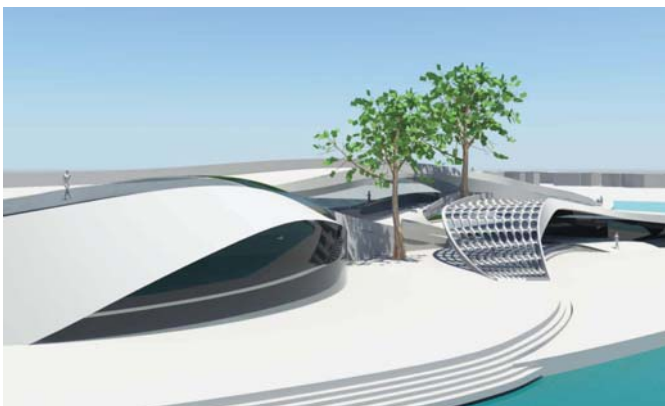

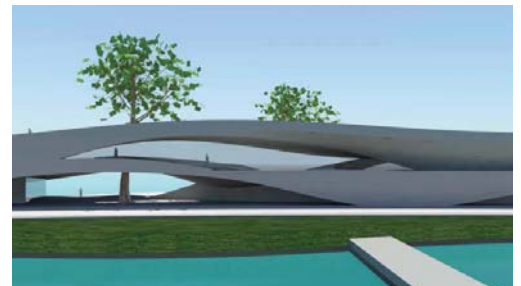

The Diving Retail and Educational Center focuses on the integration between program, nature, and circulation. Exterior and interior spaces flow into one another through an intricate system of paths and inhabitable roof surfaces. The center is designed as a living museum, which showcases cutting edge sustainable features located throughout the site, educating visitors about developing technologies while enhancing the structure's building systems.
