## Concept Statement:

In this room I wanted to create a **relaxing** and **tranquil** environment. I used subtle earthy colors and organic looking furniture. The piece of artwork is very **soft**, it has no sharp lines and when looked at, it creates a serene and peaceful atmosphere. I carried this into the room by the use of **wood** and color. The red and turquoise were added to create interest and to give the room some life. This design would be used in a room with a lot of **natural light**. There is a cello suggesting that it may be used as a music room or a quiet place to wind down after a long day.
