

AFFORDABLE HOUSING

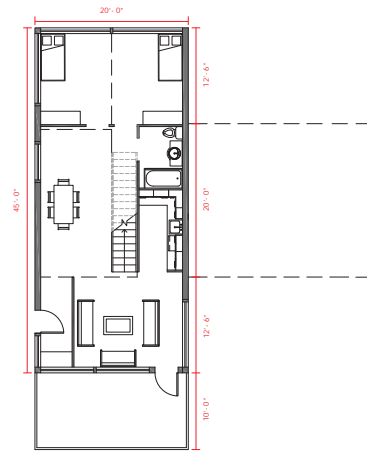

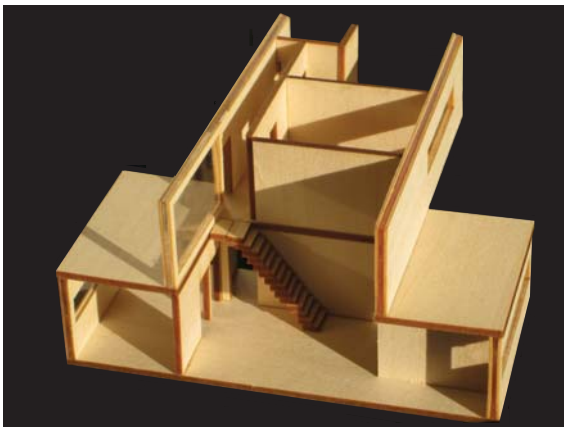

BROOKLYN, NEW YORK

Urban Mixed Use Studio

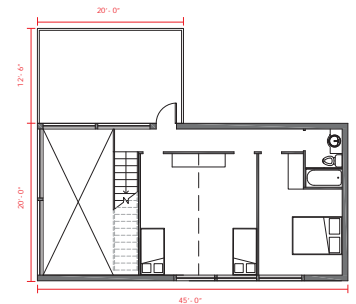

James Garrison

Fall 2009

Affordable housing project for the Williamsburg neighborhood of Brooklyn, NY. Two typical apartment units were designed. One design was for a 2/3 convertible bedroom apartment and the other design was for a 3/5 convertible bedroom apartment. The units were then aggregated to create a system of units, forming the apartment building. A fabrication shop is incorporated into the ground level of the site, creating a live/work environment.
