HNTB Federal Services Corporation
2008-2009
Ft. Lee Central Campus
Ft. Lee, Virginia

My role as a designer for this project was: Space planning and programming for a 6 building, 775,000SF, administrative and training facility including definition of furnishing, unit requirements and preparation of the entire FF&E package for furnishings, fabrics, carpeting, and unit cost estimates in accordance with Huntsville District requirements and standards. Production of FF&E package was simplified by linking the BIM data in the model into the required deliverable such as cost estimates and furniture illustration sheets.

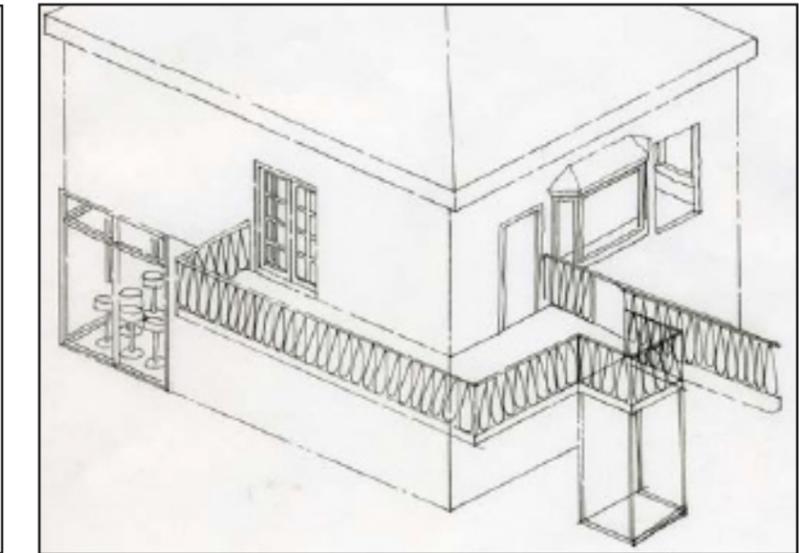

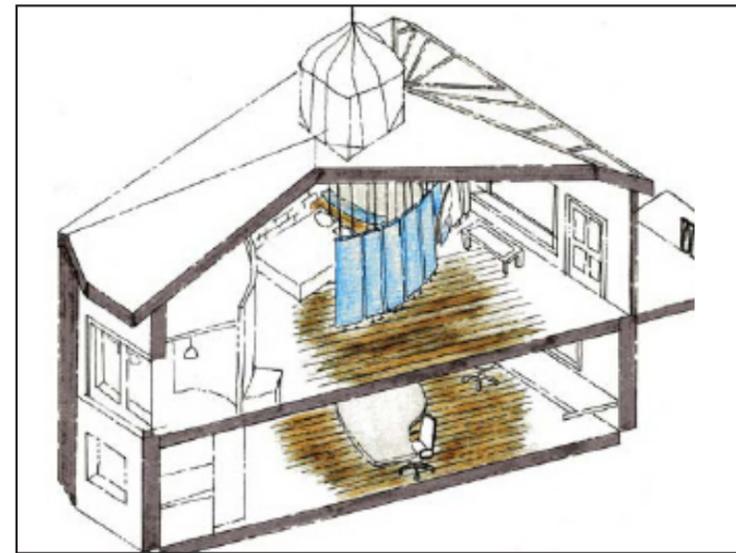

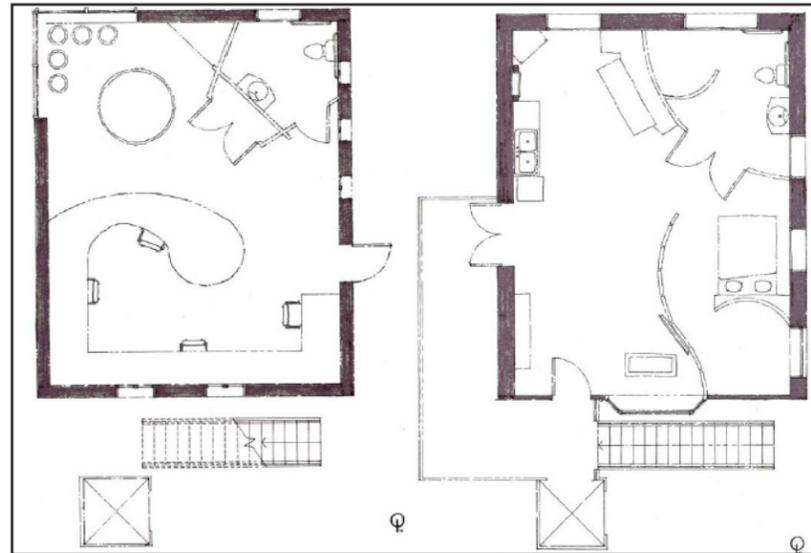

All work for this project was completed with Revit 2009.

Carriage House Renovation
Richmond, Virginia

My role as a designer for this project was to take a Carriage house in Richmond, VA and create an ADA apartment on the 2nd floor and an architecture studio on the 1st floor. For the 1st floor we needed to have a work area, meeting area, model making area, storage area and ADA bathroom. Upstairs we needed to have an ADA bathroom, bedroom, living room and full kitchen with eating area.

All work for this project was completed with Revit 2009 and then hand rendered.

Stuffy's Sub Shop Renovation
Richmond, Virginia

My role as a designer for this project was to re-design a local sub shop (Stuffy's) in Richmond, VA and the fine dining (Edo's Squid) restaurant located above it. In the sub shop we spoke with the owner and asked what he would like to see done to his shop and from there we changed the space keeping his wishes in line but also making the space ADA compliant. (Shown here)

All work for this project was completed with Revit 2009 and then hand rendered.
