

Architecture is a civilization's way of giving form to itself. It is not only expressive of culture but actively participates in shaping it. Architecture is society's most public and visible art; through it we profess our most cherished values, patterns and skills. As a discipline architecture has its roots both in art and science.

DESIGN
OLOGY

ARCHITECTS
& PLANNERS ABOUT DESIGNOLOGY

DESIGNOLOGY architects & planners was founded in 2005, in Cairo, Egypt, over those years Designology built a great reputation, not only in Egypt but also in the whole Middle East. By working hard we practiced architecture in various fields and environments in Gulf, North Africa and Egypt which encouraged us to move forward and Find new challenges in the capital of European Union and started our Europe based branch in Belgium, GENT since 2013. Always and forever we will be looking forward to practice architecture in all different aspects and environments. We are known for our strong creativity , value driven designs and our realistic 3d visualizations , we curved our line and our own trend in Designing .we apply the most advanced techniques , valuing all the creation process and making it a unique piece of art .

DESIGNOLOGY architects & planners strives to impact people through places. No matter what project we're designing, we always aim to make a difference in the city's landscape. We envision spaces that inspire people, help them connect with one another, and enrich the human experience. We do this by embracing the life, understanding the identity and diversity of the city, recognizing that every great design is the result of a combination of ideas. You'll be surprised by what we can do for you. We'd love to work with you on your next project.

CONCEPTUAL DESIGN

THEME PARK
Barrio Mexico, San Jose, Costa Rica.
architecturaldesign , Schematic design report

REQUIREMENTS

Land Area 6160 sqm
Desired buildup area 7500 sqm
Number of dwellings 50 unit

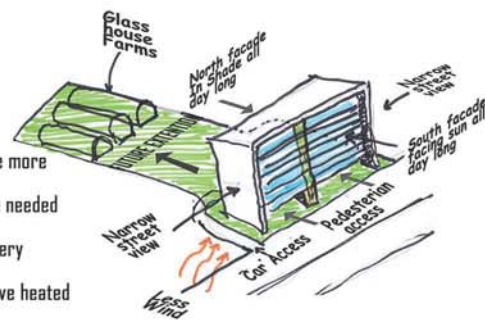

OPTION 01

two floors Buildings
foot print 3750 sqm
Gardens 2410 sqm
No future extension
No farm
2 service roads are needed
no control for the whole project

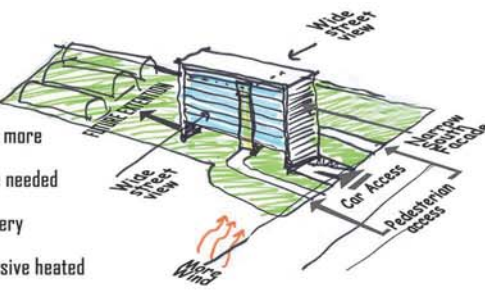

OPTION 02

14 floors Building
foot print 850 sqm
Gardens 2410 sqm
future extension twice more farm
No service roads are needed
Security & control
Kinder garden & Nursery
Narrow street view
one side can be passive heated
Less wind use

OPTION 03

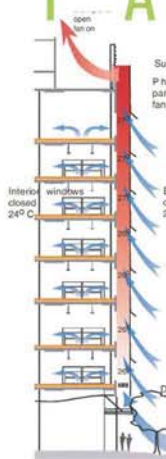

14 floors Building
foot print 850 sqm
Gardens 2410 sqm
future extension once more farm
No service roads are needed
Security & control
Kinder garden & Nursery
Wide street view
both sides can be passive heated
More wind use

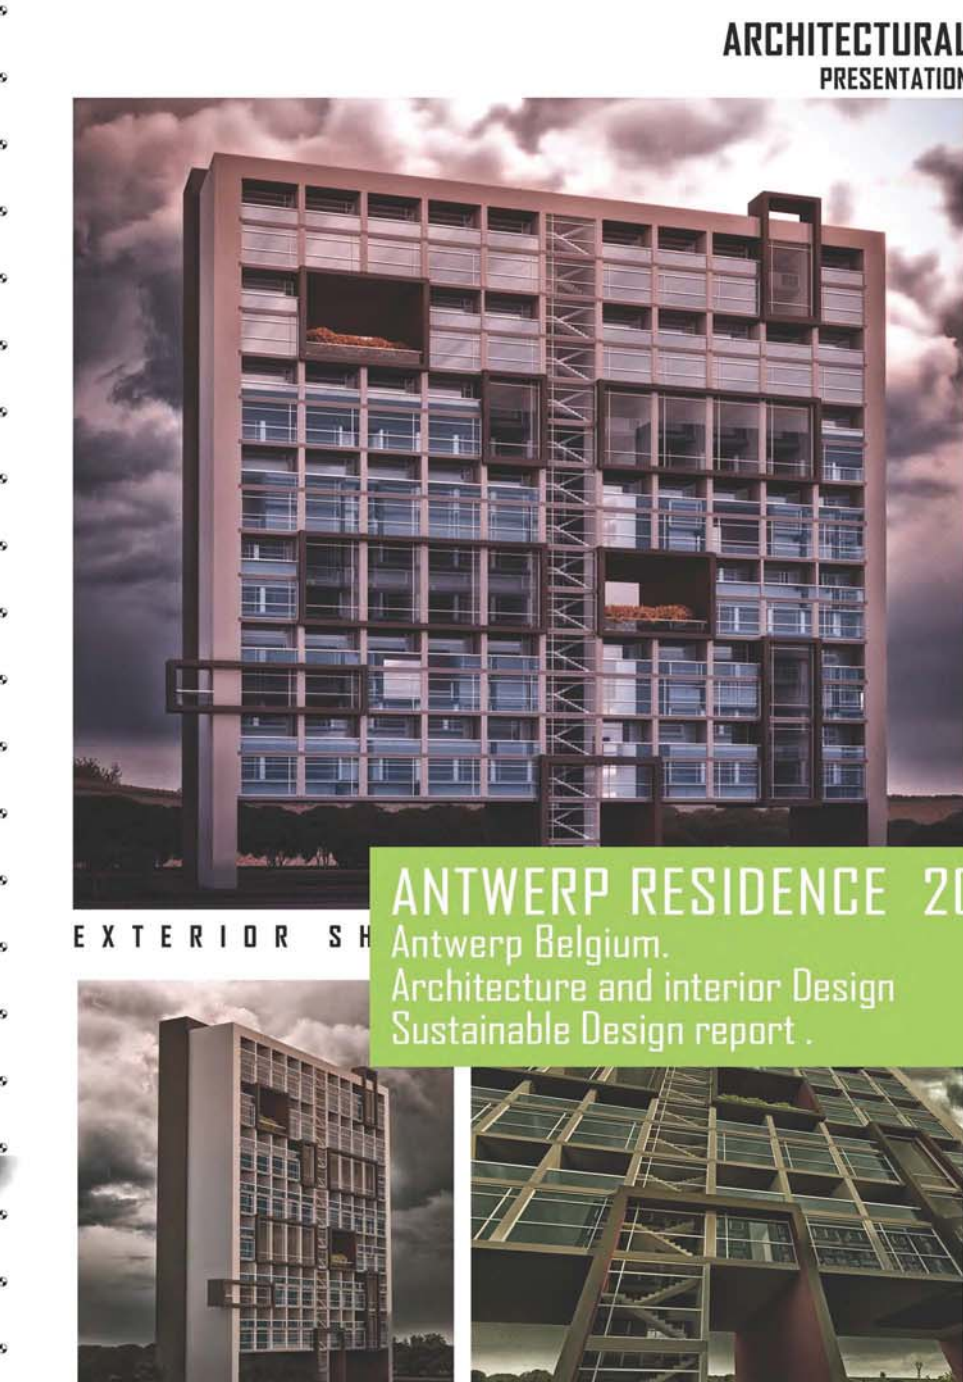

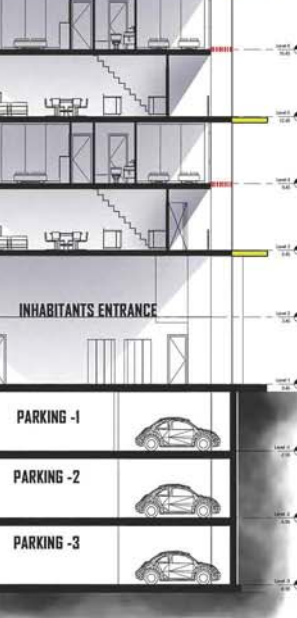

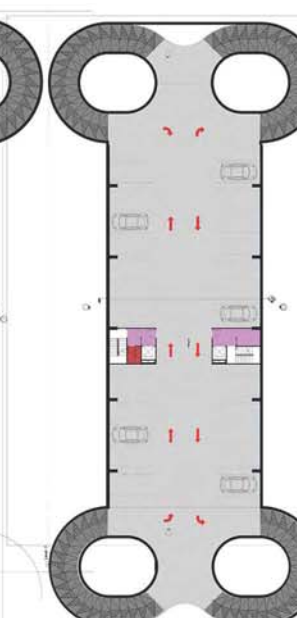

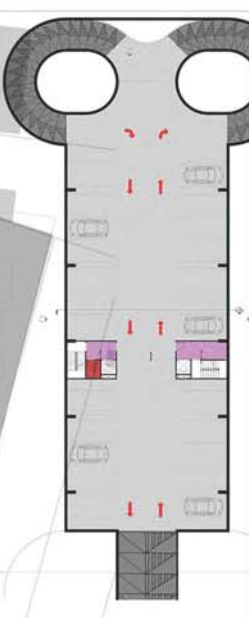

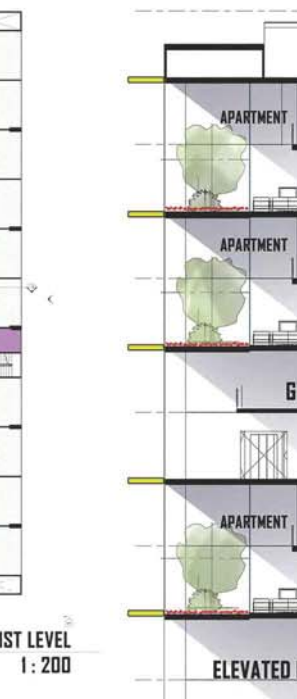

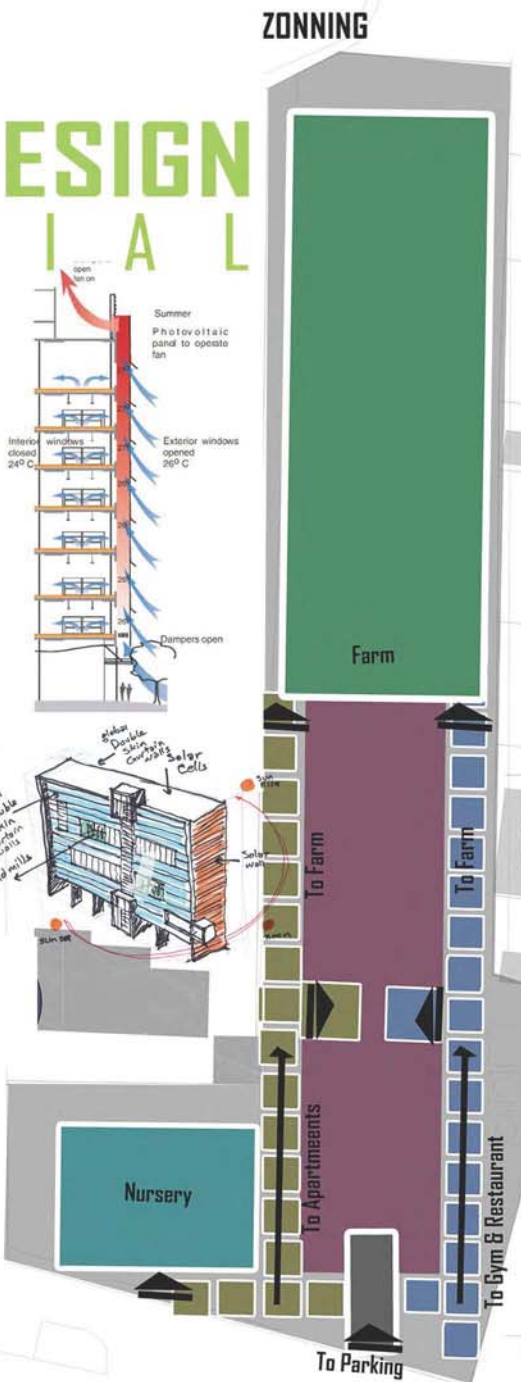

CONCEPT DEVELOPMENT MASSING

Concept Values in Brief:

- 1- Saving more land by vertical distribution
- 2- Increasing the sharing value by shared facilities
- 3- Minimising the Energy loss by using sustainable materials
- 4- Using renewable energies in a passive design concept
- 5- generating Energy from the renewable resources as sun, light, geothermal and waste recycling
- 6- Creating the Complex own farm that grows its own needed organic crops.
- 7- Minimise the Loss of energy and time by traveling distances taking by the inhabitant to get their daily needs through combining the necessary amenities for the complex such as Gym, restaurant and cafe, nursery, kindergarden, mini market.
