# HANA AGIC

ARCHITECT/INTERIOR DESIGNER/SET DESIGNER

Born and based in Sarajevo, Bosnia and Herzegovina

Tel: 00 387 61 927 948

Email: [info@hanaagic.com](mailto:info@hanaagic.com)

Web: [www.hanaagic.com](http://www.hanaagic.com)

## PROFILE

Licensed architect, with international experience in professional work in the field of architecture and interior design for 7 years

## EDUCATION

October 2012/Master degree

University of Sarajevo/Faculty of Architecture

## EXPERIENCE

May 2021-ongoing

### **Freelance work**

Freelance architect involved in various architectural and interior design projects

[/www.hanaagic.com/](http://www.hanaagic.com/)

August 2019-May 2021

### **Studio Arh**

Sarajevo,BIH

Senior architect involved in concept and construction designs for large scale residential buildings, individual houses and public urban spaces

In addition to designing building plans, preparing bids and project proposals and completing projects from design through construction

[/www.studioarh.ba/](http://www.studioarh.ba/)

## EXPERIENCE

May 2015-May 2019

### **Studio BP**

Sarajevo, BIH

- Architect involved in various project including residential and public buildings, car showrooms, industrial objects and interior design
- Preparing detailed architectural design for projects with cost estimate
- Making graphic design, 3D visualisations and presentations for concept designs for architectural projects

August 2014-May 2015

### **Scott Brownrigg** /[www.scottbrownrigg.com/](http://www.scottbrownrigg.com/)

London, UK

- Junior Architect involved in large scale projects for recognized hotel brands such as Courtyard Marriott, Plaza, Hilton, Sheraton and similar
- Preparing detailed interior design drawings and construction details
- Participation in developing various furniture and carpet designs
- Support with client presentations and mood/sample boards

February 2014-August 2014

### **NGO Cultural Heritage Without Borders** /[www.chwb.org/](http://www.chwb.org/)

Sarajevo, BIH

- Participation in restauration camps
- Making documentation, measurments and recordings for facilities damaged in natural disasters
- Making documentation for cultural heritage objects and giving proposals and suggestions for preservation and protection

January 2013-January 2014

### **Studio BP**

Sarajevo, BIH

Architect involved in various architectural project, residential buildings and housing

## EXPERIENCE

October 2011-May 2012

### **Faculty of Architecture-Workshop**

Sarajevo, BIH/Korcula Island, Croatia

- Architect assistant involved in projects for documenting cultural heritage objects on Korcula Island for UNESCO World Heritage List enrollment
- working on site
- making suggestions and ideas for interpolations of modern architecture in historical urban context

## EXPERIENCE/SET DESIGN

2018 Set design for short movie 'Mith' dir. Lamia Sabic, BIH

2017 Set design assistant for feature movie 'Majnuni', dir. Kouros Alghaband, BIH, USA

2017 Set design for short movie 'Regained Memory' dir. Stijn Bouma, BIH, NL

2016 Set design for short movie 'The Bogeyman' dir. Bianca Lukas, BIH, Poland

## COMPUTER SKILLS

OS: Windows 10

BIM: Revit Architecture

Drafting: Autocad

3D: 3dsMax, Sketchup

Rendering: Vray/Lumion 10

Graphics: Adobe CC (Photoshop)

## LANGUAGES

Bosnian/Croatian/Serbian: Mother tongue

English: Professional

French: Colloquial

## EXHIBITIONS

2019 Participation in art residency, Tartu, Estonia  
-working on video installation

2018 Solo painting exhibition 'Inner Flame', Gallery Steiner, Vienna, Austria

2016 Group painting exhibition 'Life Dream Death', Kriterion, Sarajevo, BIH

2015 Group photography exhibition 'Sarajevo Mind Map', Sarajevo War Theater, Sarajevo, BIH

2012 Group exhibition 'Urban spaces redesign, Town Museum, Korcula Island, Croatia

## MAIN PROJECTS

SELECTED WORKS  
ARCHITECTURE  
2012-2021

# HISTORIC INTERVENTION IN THE URBAN HISTORICAL CONTEXT-ACTIVITY HOUSE

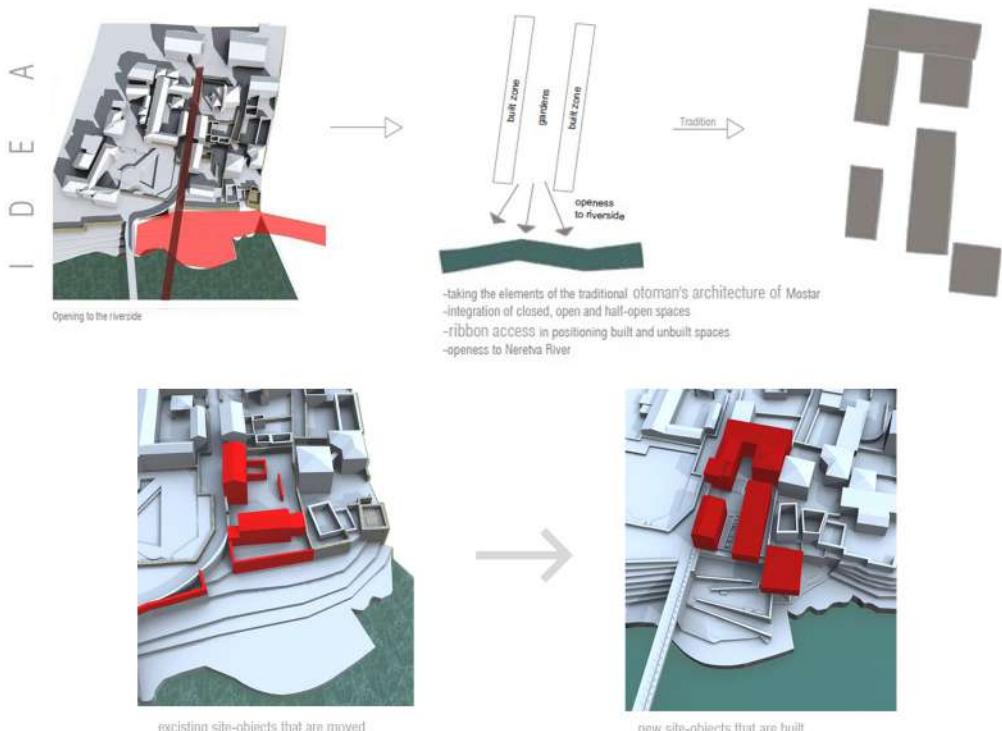

Mostar, Bosnia and Herzegovina

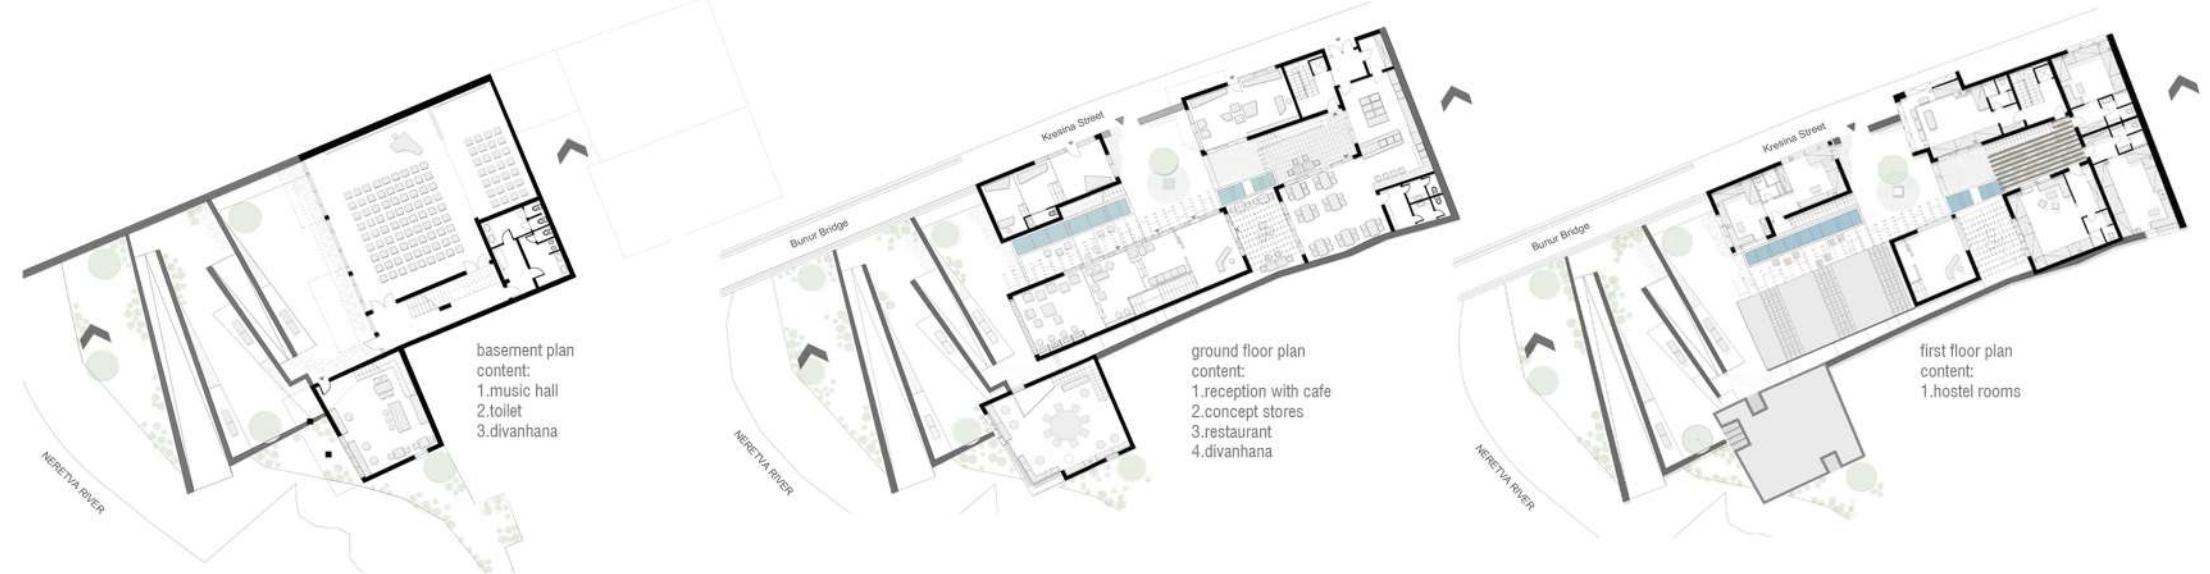

The project was exhibited in cultural center Abrasevic, Mostar, BIH, 2012.

The project was designed as the part of the subject 'Historic intervention in the urban historical context' and it is located in Roznamedžijina mahala in Mostar (BIH). On the site there are several objects which have sacred and environmental values and they belong to the historical urban context of the city of Mostar. The plot on which this conceptual project is located is near Bunur bridge and the rocky coast of the Neretva River which was once used as a place for swimming. Since the war in 1992 until today, there were built two houses that have no value and are almost in ruinous condition. The new project envisages the demolition of these buildings since they have no any value and making the new project with the shape and form that will fit into the existing urban context and with the right function that will make this part of the Mostar attractive again.

The basic idea of the project is using the typical and traditional elements of Mostar construction and architecture through the modern architectural interventions. This includes the design that will contain these characteristic elements of Mostar construction such as inner courtyards, greenery and water interactions, the use of traditional materials such as wood and stone and building a larger number of smaller residential units.

The project is called Activity house due to its multifunctionality. The object is open to all tourists and citizens and it offers a number of facilities such as multimedia hall for various cultural events, restaurants, common areas, commercial facilities, hostel and a small restaurant for eating. The building has ramps associated with the rocky coast of the Neretva River, which is planned to be used for swimming. Multifunctionality of object gives the possibility to be used by a large number of people and makes this destination of the city more useful.

## RESIDENTIAL BUILDING COMPLEX 'RIVERINA'

Studio Arh [/www.studioarh.ba/](http://www.studioarh.ba/)

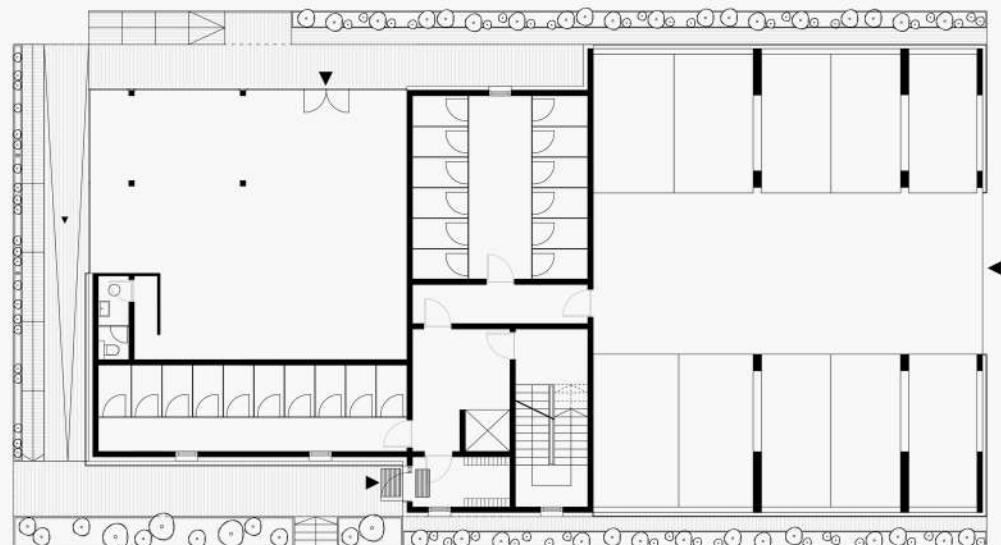

Sarajevo, Bosnia and Herzegovina

Residential buildings 'Riverina' are part of new urban plan in western part of Sarajevo made to provide the best standards of life, lifestyle and quality home. Different type of objects are planned for this area: business buildings, residential housing and shopping mall. All residential buildings have underground parking spots, so that on the surface there is plenty of space for green zones, parks and areas for children. Buildings have different types of apartments: studio apartments with one bedroom, middle size apartments and luxury apartments with 3-4 bedrooms.

I was working on complete architectural design, blueprints and 3D visualisation for two residential buildings.

## SITE PLAN

### **SPORT CENTER 'DARIVA'**

**Studio Arh** [/www.studioarh.ba/](http://www.studioarh.ba/)

Sarajevo, Bosnia and Herzegovina

Sport centre 'Dariva' is located in very attractive green zone in Sarajevo that people use for relaxation, walking and mountain climbing. However, there are still some disadvantages like lack of urban furniture, lack of attractive content that could bring more people to the location, and lack of spaces where sportists can take a break and have a drink.

One of the main aims of sport center project is to activate this location more and to bring new contents for both sportists and people who want to relax. Since the location is surrounded by beautiful nature, design of the sport center tends to incorporate with natural environment also by using mostly wood for material.

Sport center has two football spots one of which can be used for children trainings, place for audience, rooms for media and administration, cafe and restaurant with garden. Sportists have their separate change rooms and toilets. The project is designed completely according to UEFA rules for architectural design and dimensions.

I was involved in making the complete architectural design, blueprints and 3D visualisation for the project.

## APARTHOTEL 'JAHORINA'

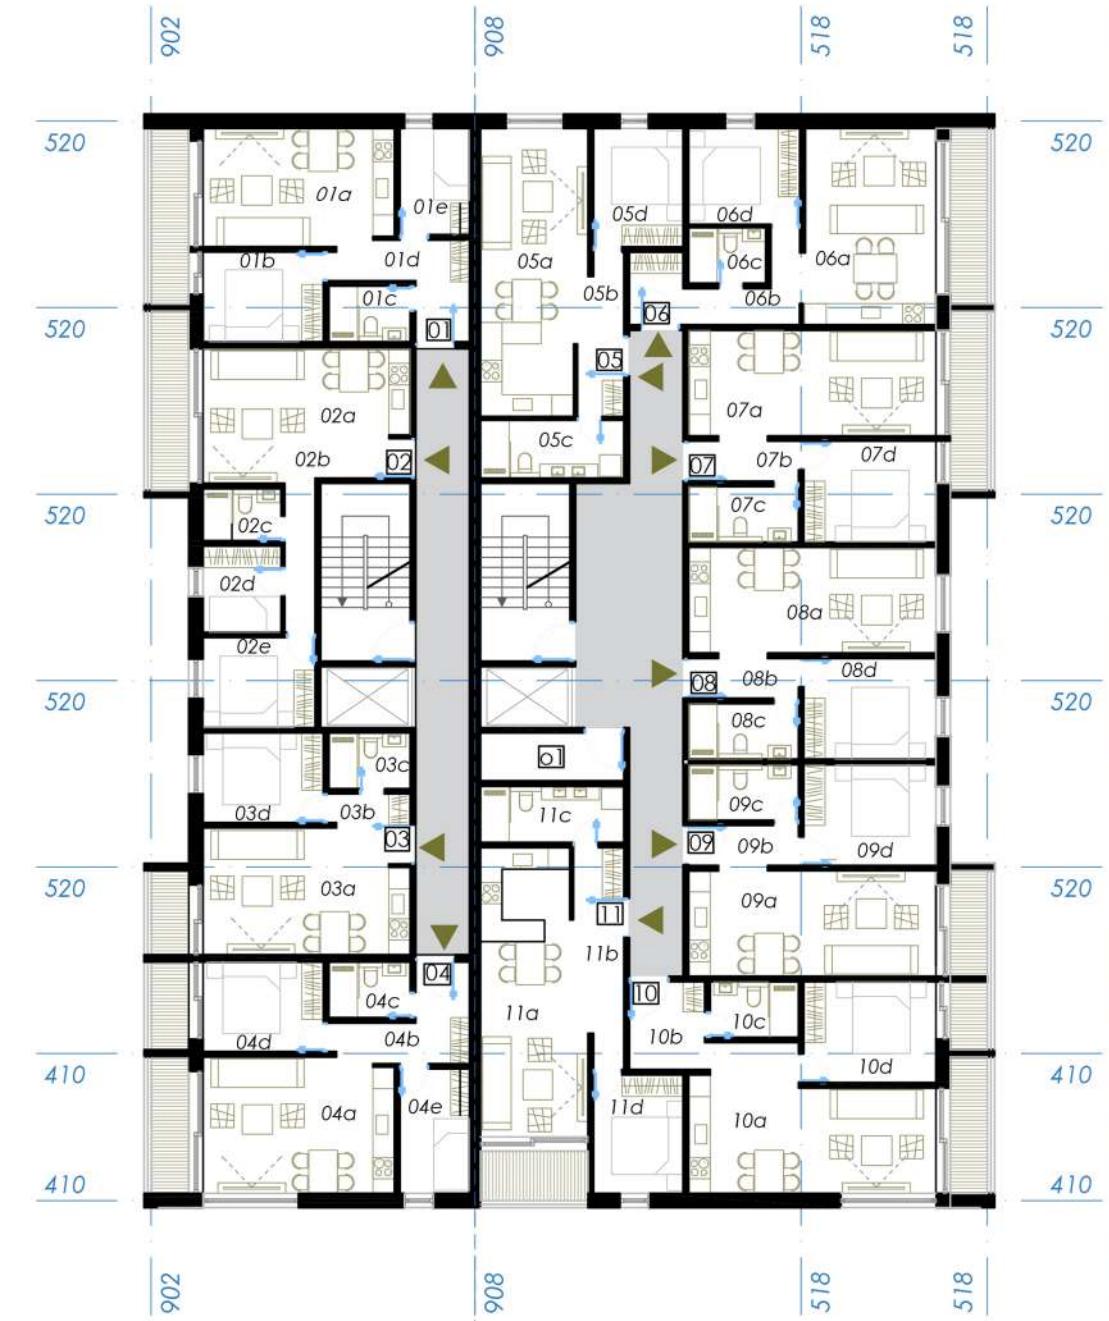

**Studio Arh** / [www.studioarh.ba/](http://www.studioarh.ba/)

Jahorina, Bosnia and Herzegovina

Aparthotel 'Jahorina' is located in attractive mountain zone and is made for tourists and sportists during the ski season. Hotel has around 50 guest rooms, breakfast restaurant, cafe and wellness spa center that can attract people to come during low season too. Object is different for its mountain design, sloping walls covered with sheet metal, and decorative wooden frames around windows.

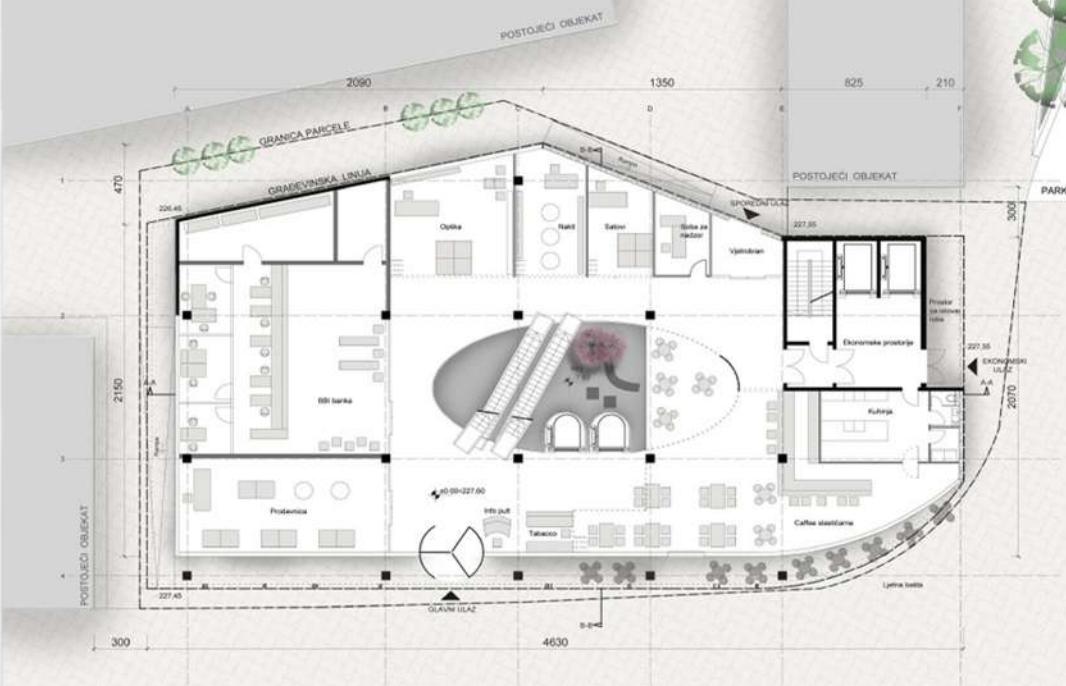

I was involved in making facade design and 3D visualisation.

GROUND FLOOR PLAN

## BBI GALERY SHOPPING MALL Studio BP

Bihać, Bosnia and Herzegovina

Object is located in the main square in town Bihać, in the place where old cinema KINO UNA currently exists. Object has groundfloor with main entrance and 4 upper floors. In the ground there are cafes and accessories shops, on the last floor there is space made for children and restaurant. The rest floors are filled with spaces for shops from different brands. By using modern materials, colors and design object tends to make harmony with environment, activate the main square and bring more content for citizens.

I was involved in making blueprints and graphic design for the project drawings.

INTERIOR DESIGN  
2012-2021

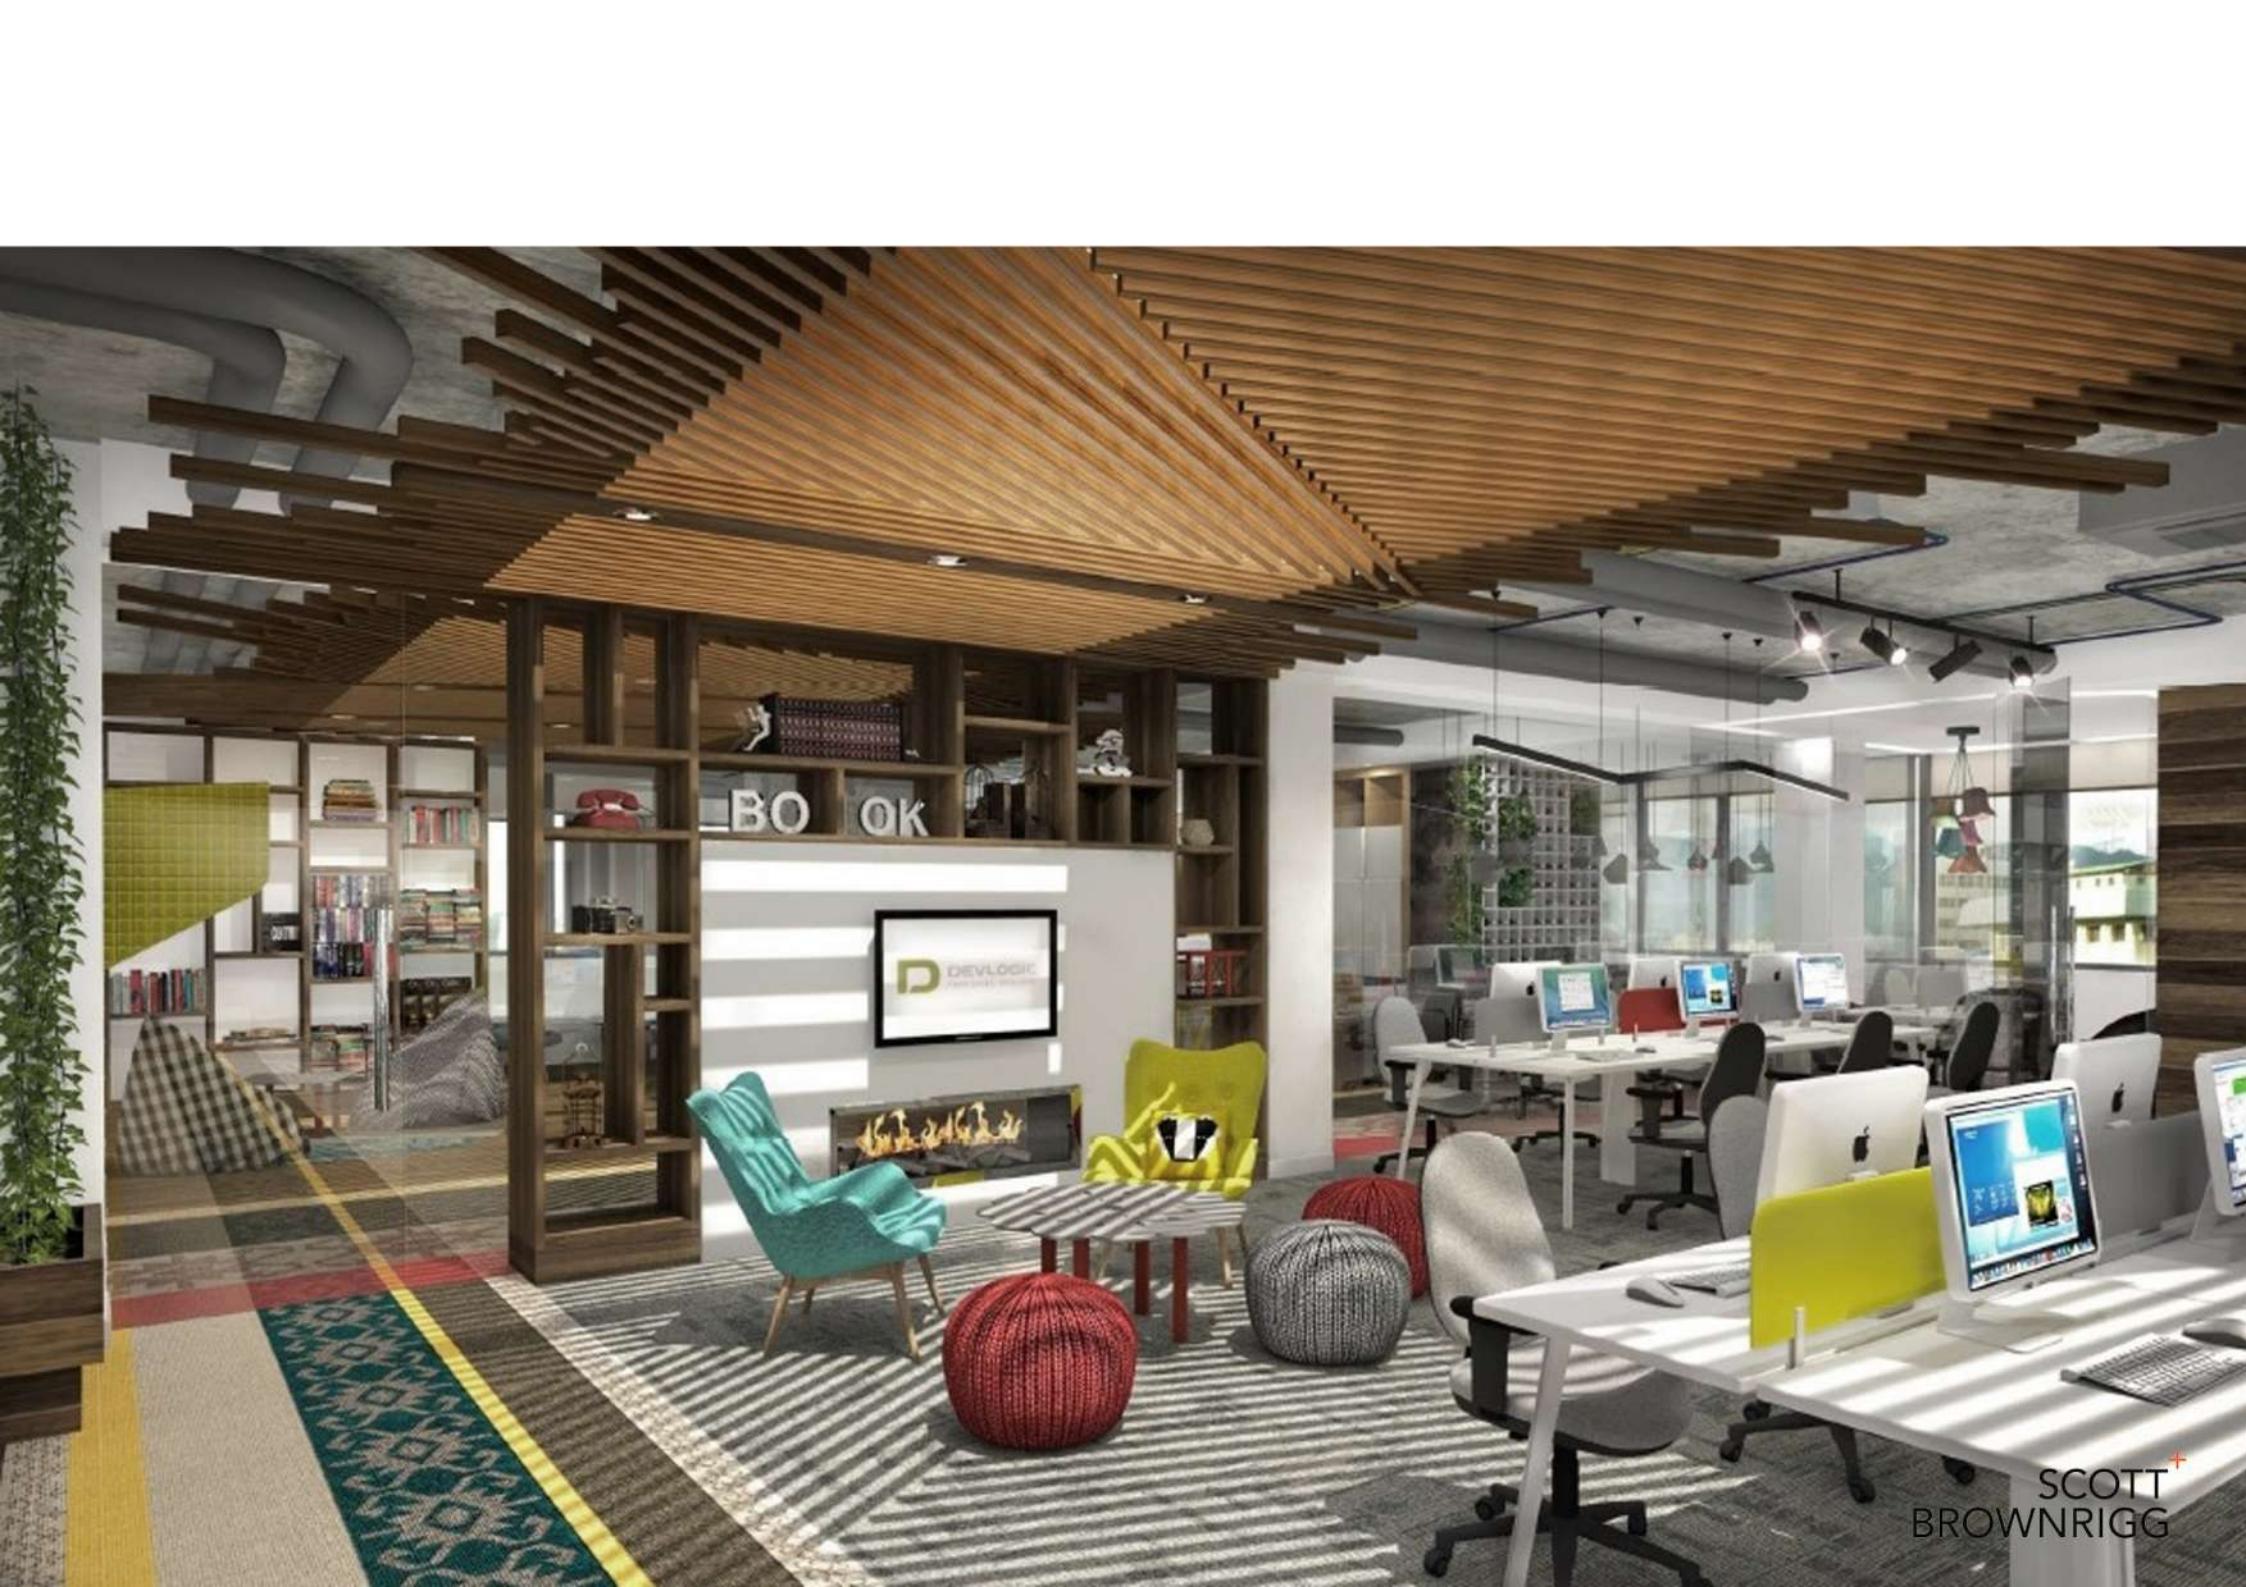

## OFFICE 'DEVLOGIC' **Scott Brownrigg** [/www.scottbrownrigg.com/](http://www.scottbrownrigg.com/)

Sarajevo, Bosnia and Herzegovina

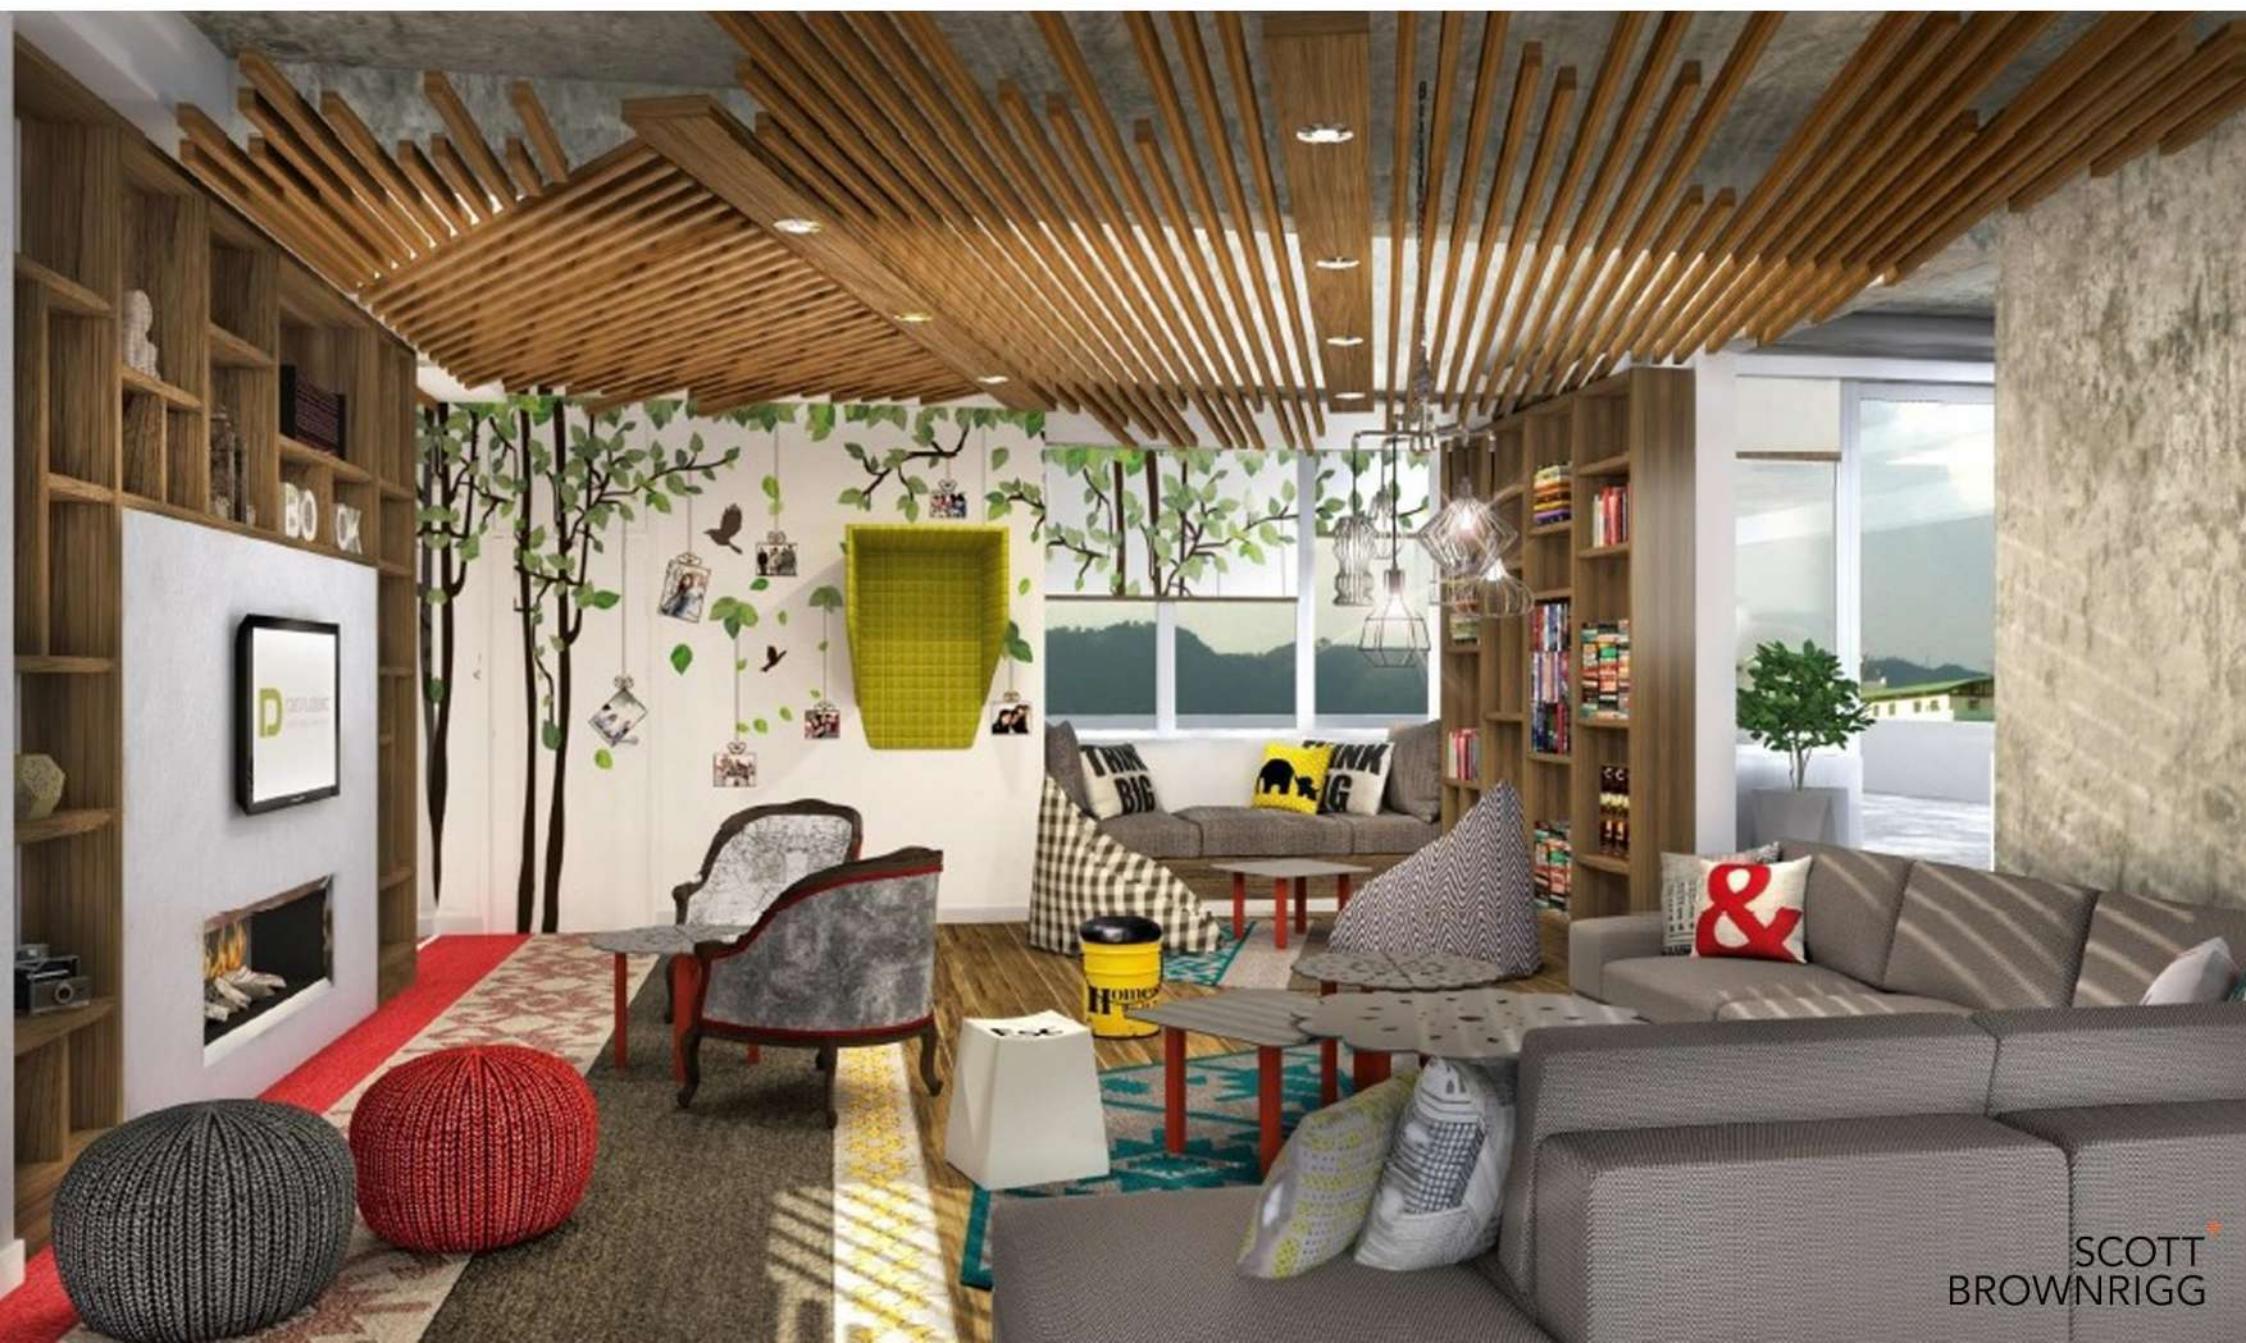

The project is the interior design for the IT company 'Devlogic'. One of the main inspirations was traditional bosnian furniture and carpentry patterns, that are interpreted in a modern way and included in interior in the combination with vintage furniture and accessories. The goal of this eclectic and expresionistic space is to make users feel cozy at their jobs and to have a feeling like there are at home. There are various spaces in the office where employers can work, and also have fun and relax. The office have huge office room, bar with kitchen, dining and living room, 3 meeting rooms, fitness, meditation room, toilets and big roof terace.

I was involved in interior design for the meeting rooms and meditation room, preparing all nesessary blueprints and making drawings graphic design.

## HOTEL 'VONDELPARK'

**Scott Brownrigg** [/www.scottbrownrigg.com/](http://www.scottbrownrigg.com/)

Amsterdam, The Netherlands

The project presents interior design for standard room with bathroom and corridors of the hotel 'Vondelpark' in Amsterdam.

Hotel is surrounded by beautiful nature of big park which autumn colors were the main inspiration for making interior design. The aim of the design was to involve and reflect nature from outside into inner spaces and rooms.

Color sheme is made from various green colors used for textile, yellow gold for details and accessories, and dark grey finishes for walls and bed.

I was involved in making the interior design proposal for standard room and drawings grafic design.

## CAFE 'AT MEJDAN'

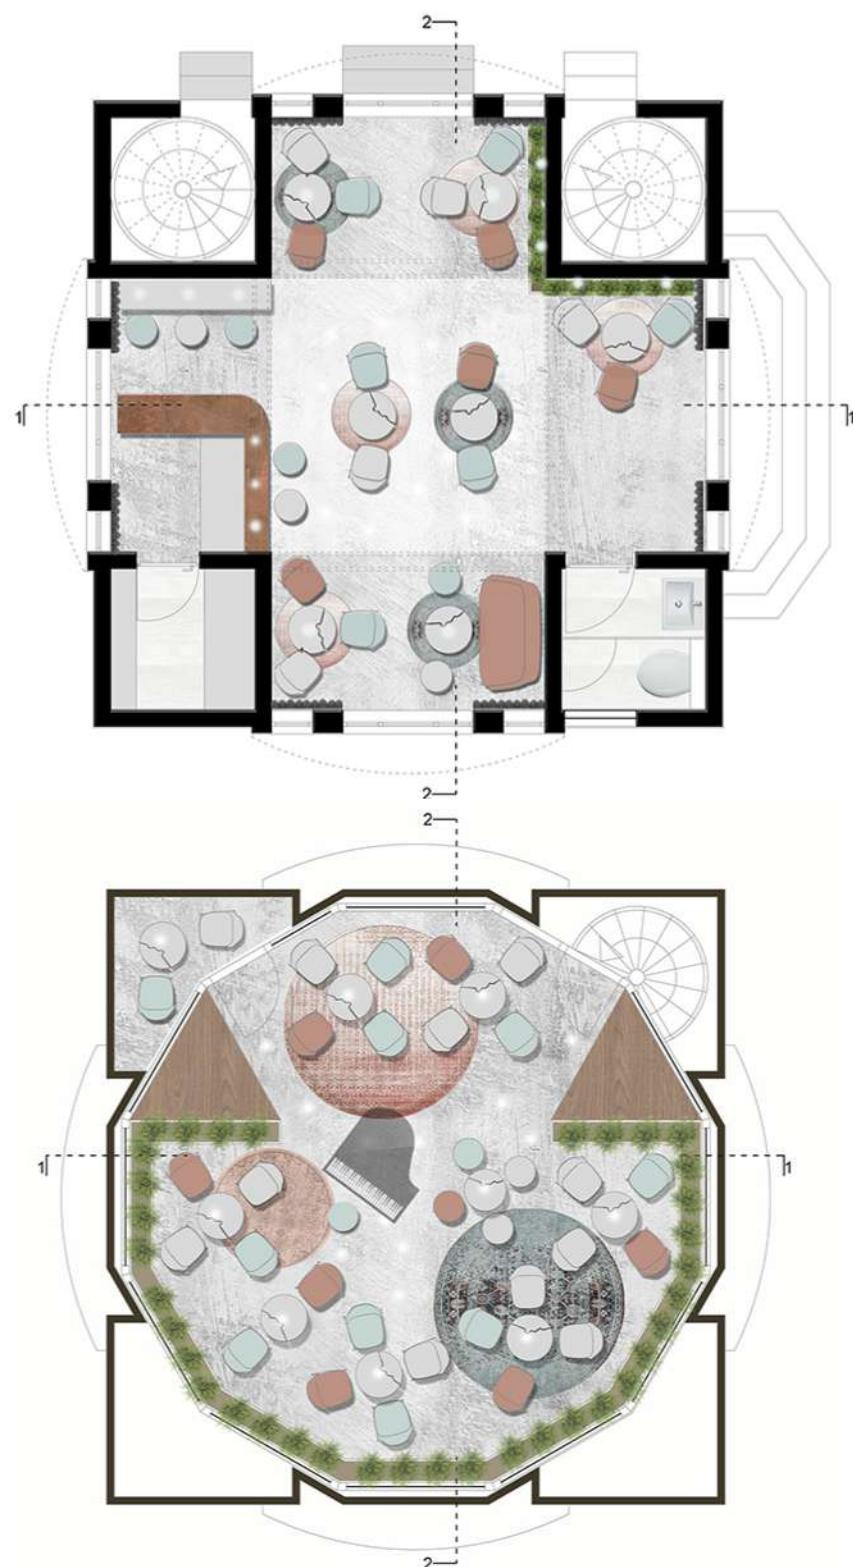

Sarajevo, Bosnia and Herzegovina

The project took place in an old musical pavilion located in a beautiful park in the old part of the Sarajevo city. Pavillon was build during Austro-Hungarian period where there were four pavillions of this kind, and this one is the only one survived. The pavillion was not used enough and needed some new function that would give him back attractiveness and through which the object would be maintained and prevented from possible future degradations.

New project proposes a redesign of interior that would give him back his primary function- place where people meet and listen to the music. The dark and heavy wood in existing site is refreshed with white concrete floor in combination with light pastel colours of furniture and copper which remains of traditional bosnian materials that were used for making certain types of furniture and accessories.

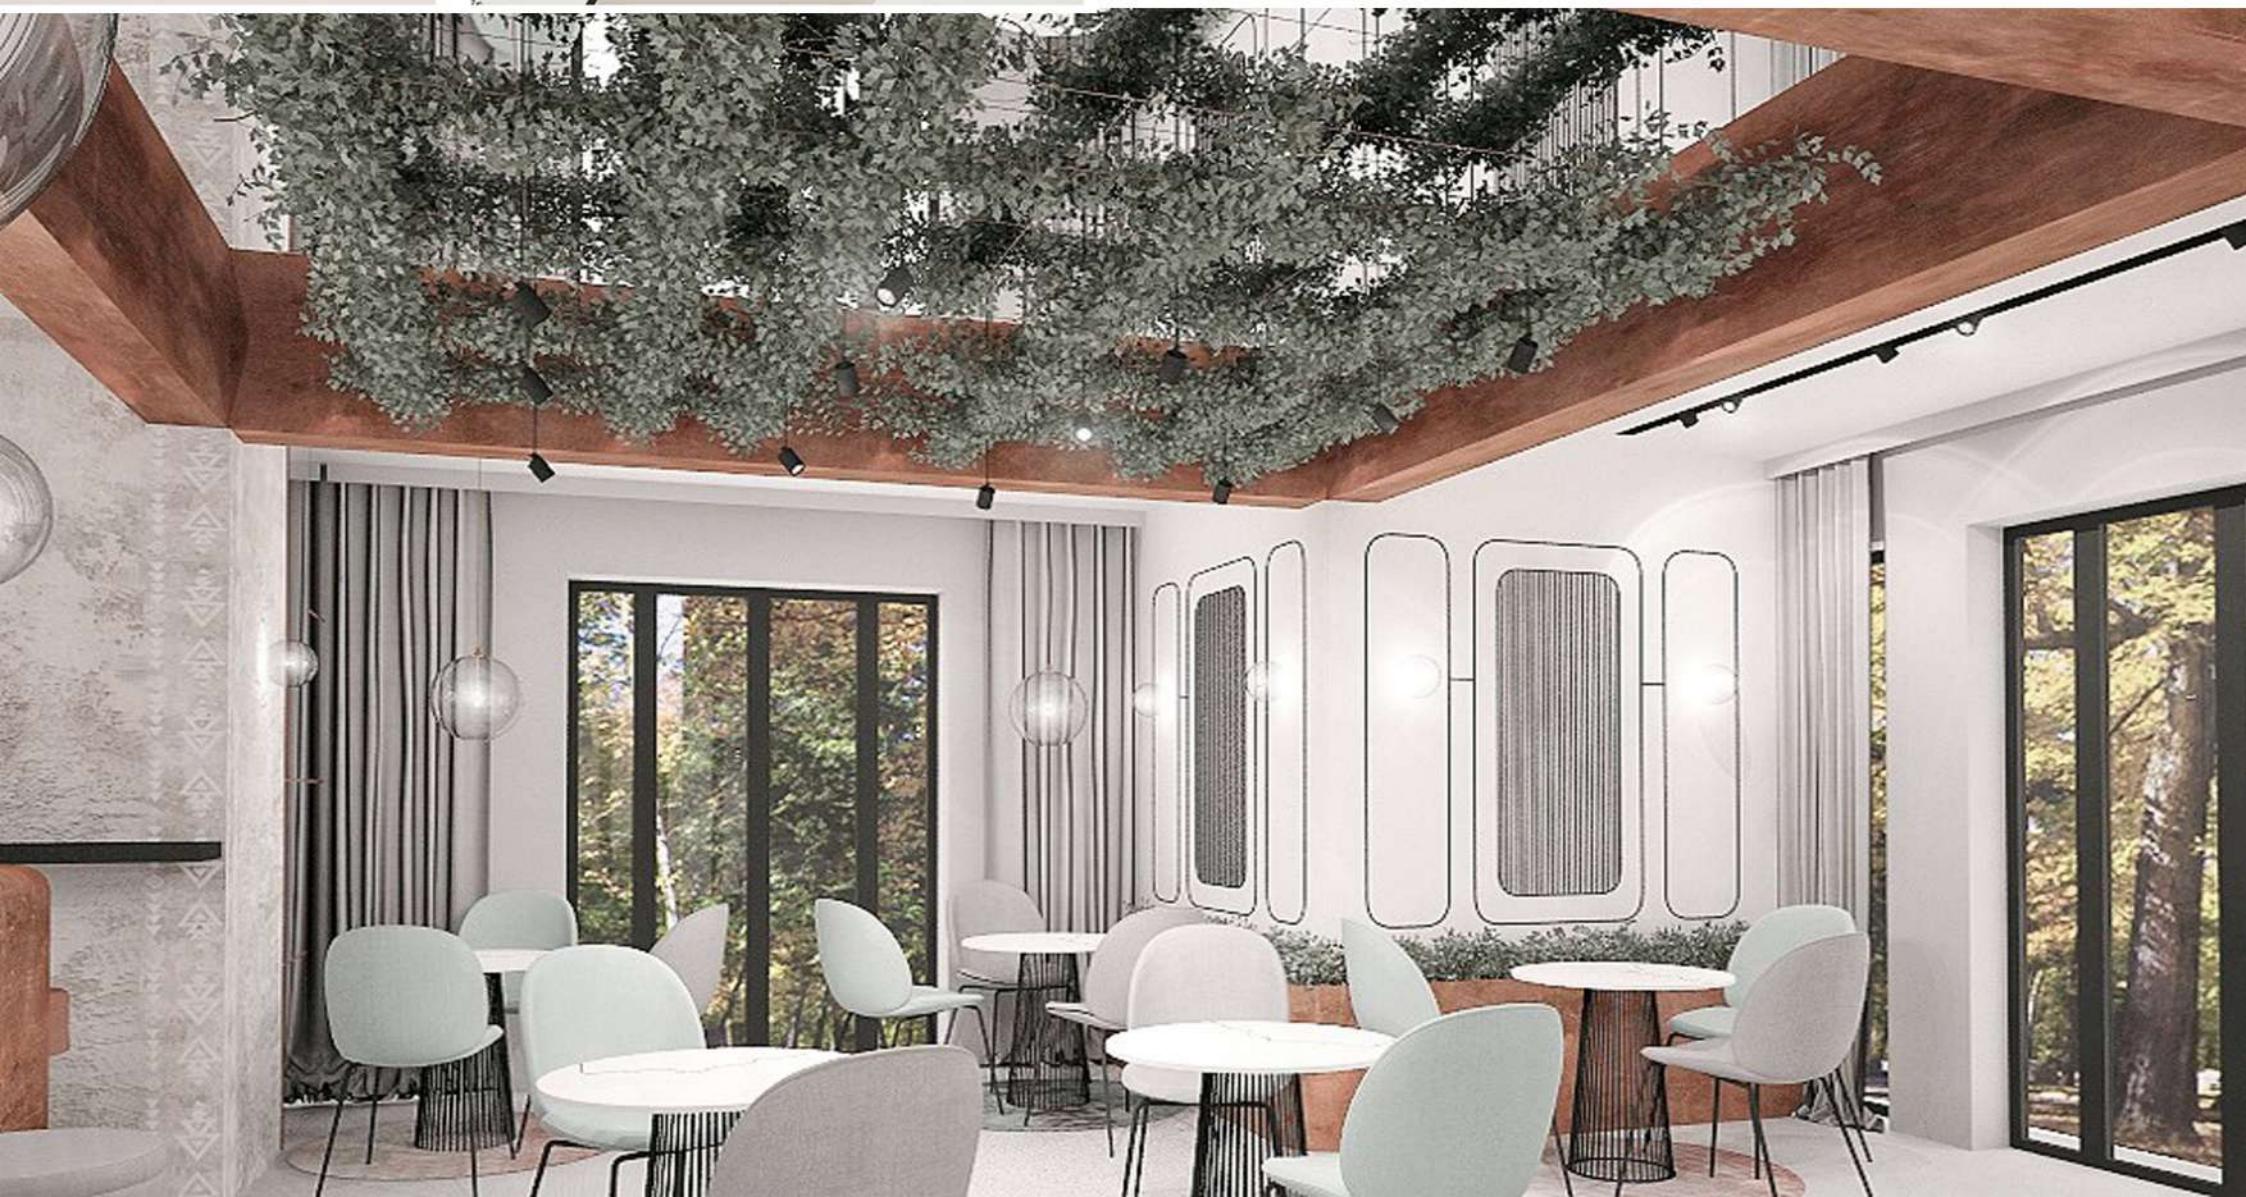

Upper floor has octagonal shape and is designed with the same color scheme as ground floor with the space where people can play and listen to the music. Since the pavillion is located in the park, project proposes his integration into interior as well, so we see presence of the plants on the ceiling of ground floor and between glass panels of upper floor.

The project is one step more towards preservation of all historical valuable objects of Sarajevo that are 'speaking' about the diverse history of the city. The project is in process of realisation.

## FASHION STORE 'HAVE 2 HAVE'

Sarajevo, Bosnia and Herzegovina

Small fashion store is located in the old town in the heart of Sarajevo. Interior is done in very bright pastel colors in combination with rose gold metal details. All furniture is handmade in minimalistic style. Shop has three parts: one is entrance with representative display pult and lightnings, in the second part there is sitting area and in third part are cabins. All parts are surrounded with minimalistic shelves for exposing clothes. Shop has little storage too. Brand logo is made in three variations so that it can be applicable for different things such as paper bags, visit cards, catalogues and similar. Project is realised in 2017.

## APARTMENT INTERIOR DESIGN

Dubai, UAE

The task for the interior design was to keep existing furniture as much as possible with possibility to wrap some furniture with another decors or colors and to make new furniture arrangement so that the space is more practical to use. Interior design suggests ideas for kitchen, entrance hall and new colors palette for whole space.

Interior design consists of mostly green and beige pastel colors, with a lot of plants involved around. Since the apartment is located in desert climate the main inspiration was to make little 'oaza' in the apartment, so that people who live in it have impression that they are surrounded by nature or that they feel touch of forest in it.

## APARTMENT INTERIOR DESIGN

Velika Kladuša, Bosnia and Herzegovina

The aim of the project was to create a modern, functional apartment in the spirit of minimalism, but at the same time allowing you to feel a home atmosphere. The nature of the interior, dominated by geometric shapes and clean lines, aims to achieve subdued elegance, tasteful details, play with colors and contrasts with the use of noble materials. The elements that unite the space are the oak floor and vertical wooden slats in the living room and dining room, which visually separate the zones while enhancing the coherent character of the interior.

The floor is finished with an oiled oak plank combined with porcelain tiles in the hall, kitchen and bathroom. The living room has been optically and functionally connected with the dining room and kitchen with bar table, so that all spaces are connected through big open space.

In the kitchen, the wall from floor to ceiling has been arranged with furniture, except for the part below window. Additionally, the working space is enlarged by an island attached to the wall, separating the kitchen area from the living room. The colors of the fronts are based on warm white and white marble stone combined with the wood of the top.
