About

I am a college graduate from Drury University with a Bachelor's Degree in Architecture and a Bachelor's of Fine Arts Degree, focused on ceramic wheel throwing and hand building.

I have experience with Revit by Autodesk with a certification from IMAGINiT as well as practice with Sketchup and Adobe suite of products, examples of which are included in this portfolio.

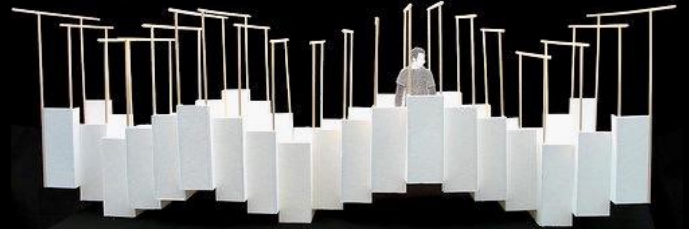

I am skilled in drawing, ceramics, sculpture, and architectural drafting, with significant visual design skills in retail layout and visual merchandising.

My art uses a classical form, while experimenting with non-classical design, coloring, shade, and shadow. I am inspired by Ancient Greek art and architecture and try to convey a sense of nature and simplicity in my work. I focus on form and how it can influence the grandeur of space, and the emotions people feel within that space.
