VHO MODULAR STAGE SET

Yimeng Teng is a design professional and registered architect working and living in California. She has expertise in crafting spaces for both public architecture and private residences. With a background in bridge engineering and a master degree in architectural design, she has developed well-rounded experiences in the design and construction industry in the US.

Her design focuses on creativity in form and function by expressing materiality and structure in architecture. In this way, people's experience will be expanded than being limited to individual spaces. She is also keen on the possibility of adaptive reuse and has done many renovation projects to recreate contemporary life into older buildings.

Yimeng has been acknowledged with numerous awards and competitions as well as national and international exhibitions. In 2023, she is appointed to be the jury member for a series of prestigious design awards including 2024 AIA's Architecture award and Twenty-five Year Award.
