ABOUT ERICK

Erick Alvarez, who graduated in Ecuador in 2021, has a bachelor's degree as an Urban Architect. Passionate about architectural design and construction, and with around a 3-year experience with different architectural projects in residential, commercial, landscape, and urbanism, Erick has been collaborating and in charge of different projects in the city of Ambato in Ecuador.

Passionate and innovative, his main goal is to achieve good architecture using different BIM technologies as well as respecting codes and regulations.

ARCHITECTURAL PROJECTS

GONZALES HOUSE
TISALEO - ECUADOR

A residential project for a family of four with only two requirements, keeping the architectural design as similar as the local context with a low budget.

For the entire project, the relationship between the interior and exterior was considered, maintaining convenience and comfort for the family, taking into account the spatiality, in addition to allowing proper ventilation and the entry of natural light throughout the day.

QUINTA VICTORIA
TISALEO - ECUADOR

For private commercial use, Quinta Victoria was designed to allow the use of facilities such as swimming pools and glamping within the same place.

Located in the same area as the Gonzales House, it was considered to be able to use the facilities and allow the connection between the user and nature, reflecting comfort, modernity without leaving the built context aside.

STATE PRISON FOR THE CITY OF AMBATO

AMBATO- ECUADOR

With the main interest of rehabilitating the prisoner from an adequate space with functional areas for rehabilitation, the new Ambato State Prison was designed to comply with its relocation according to the new building codes of the city.

It has a total of 14 buildings and a capacity for 1536 prisoners, its design is integral to the modernization of the local architecture in terms of the prison system.

SUZUKI DEALERSHIP
RIOBAMBA- ECUADOR

This project, designed for the Suzuki company, is characterized by its modern architecture based on the implementation of large windows for natural lighting as well as proper ventilation.

Its modernity can be appreciated both in its interior and exterior, its design allows to generate a new and contemporary architecture that allows the modernization of the area in which it is located.

A photograph of a modern living room. In the foreground, a large, light-colored sofa with several pillows is positioned against a wall. A low, rectangular coffee table sits in front of the sofa, holding a small vase with flowers and a few books. To the right, a dining area is visible, featuring a round white table and four dark chairs. Above the table, a wall-mounted shelving unit displays various decorative items. The room has a minimalist design with white walls and a light-colored floor.

A vibrant urban street scene. In the foreground, a person in a red shirt and blue jeans rides a bicycle with a large blue circle highlighting the front wheel. The street is paved with a colorful diamond-patterned tile. In the background, there's a large stone church with a tall spire, a modern multi-story building, and a bus stop where several people are waiting. A green traffic light is visible. The overall atmosphere is bright and lively.

URBAN PLANNING PROJECTS

**AMBATO MOVES BY BIKE AND ON
FOOT - YesInnovation**

Generating an urban project with a vision of sustainability was the main objective of this project.

By implementing a network of cycle paths throughout the city, the objective was to generate a new style of mobility within the city, taking advantage of the different spaces and public roads throughout the entire city.
