PROJECT

MarSH Marine Science Hub in Port Ghalib

03

The primary objective of the project was the revitalization of HEPCA's Marine Research Centre located in Marsa Alam's Port Ghalib.

04

PROJECT

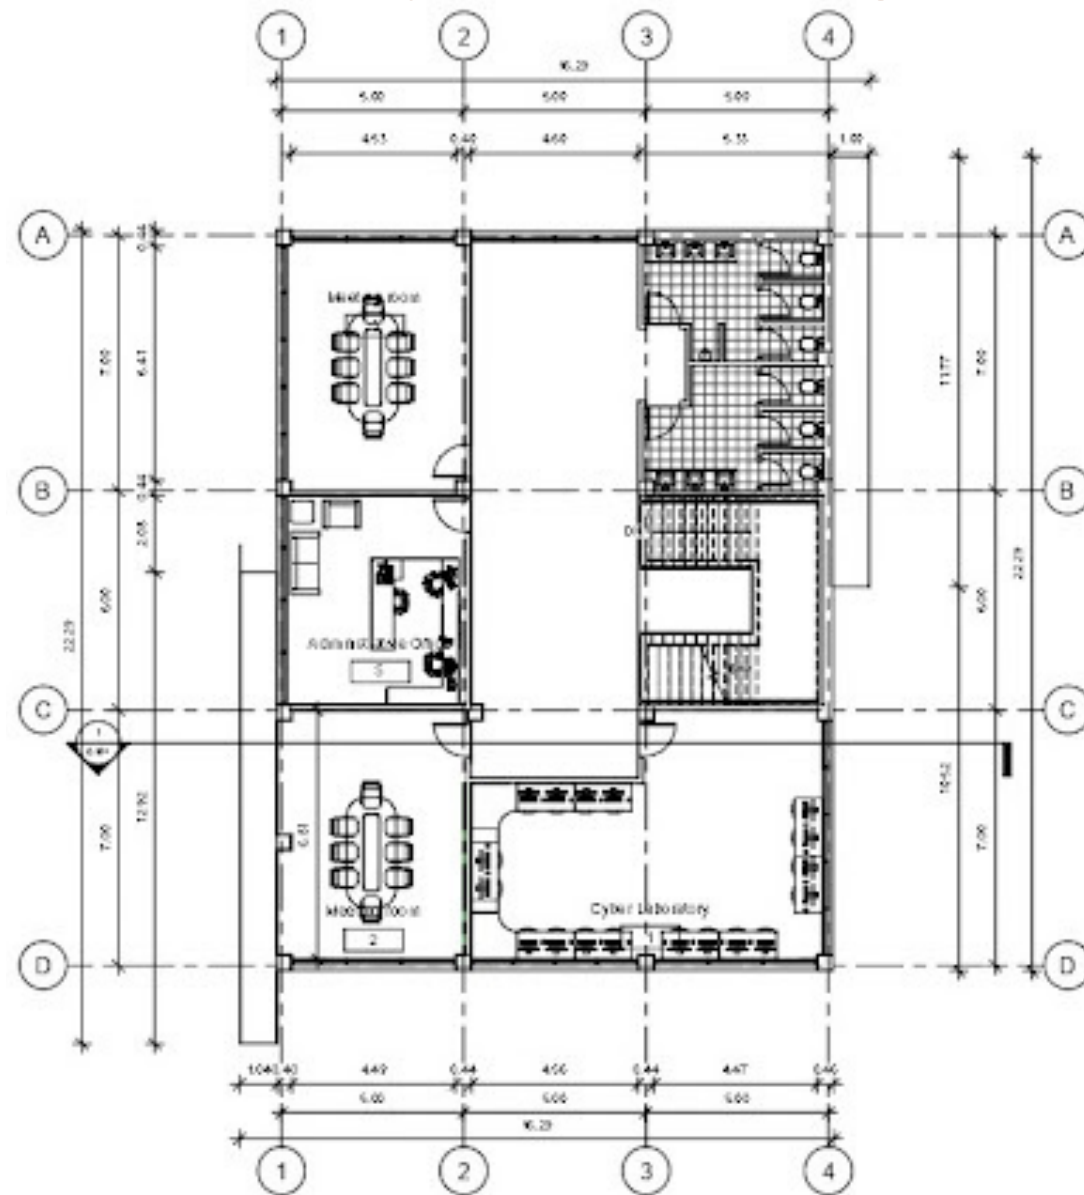

On Campus Student Gallery

05

The "On-Campus Student Gallery Using BIM" project at our university exemplifies our commitment to innovation and education. This initiative harnesses the power of Building Information Modeling (BIM) to design a modern and sustainable student gallery space. Through BIM, students collaborate across disciplines, ensuring efficient planning, cost control, and environmentally responsible design.

Modern Apartment Design and Modeling

07

In the "Modern Apartment Design and Modeling" project, I used Rhino for the initial design and Revit for detailed modeling. This allowed me to create a complete modern apartment with precision. I paid attention to every detail, from structure to interior furnishings. The project showcases my skills in combining creativity with practicality in architectural design and modeling.
