## RESTAURANT LENHA

**Project Type** | Comercial

**Location** | Via antigua Boconó, Villa del Rosario

**Scope:** The design process for this project lasted one and a half months due to the client's urgent need to begin construction and open the restaurant. My responsibilities included: 3D modeling of the project, Furniture design for the restaurant, Drafting architectural plans, Rendering and presenting the project.

## ARCHITECTURAL PLAN

This commercial project is located on Via Antigua Boconó, surrounded by other businesses and a paddle court. The primary objective was to combine rustic and industrial styles, creating a welcoming and family-friendly interior design.

## FIGUEREDO HOUSE

**Project Type** | Residencial

**Location** | Via antigua Boconó, Villa del Rosario

**Scope:** The design process for this residential project took one month. My responsibilities included: 3D modeling of the project, Furniture design for the kitchen, bedroom and bathroom, drafting architectural plans, rendering and presenting the project

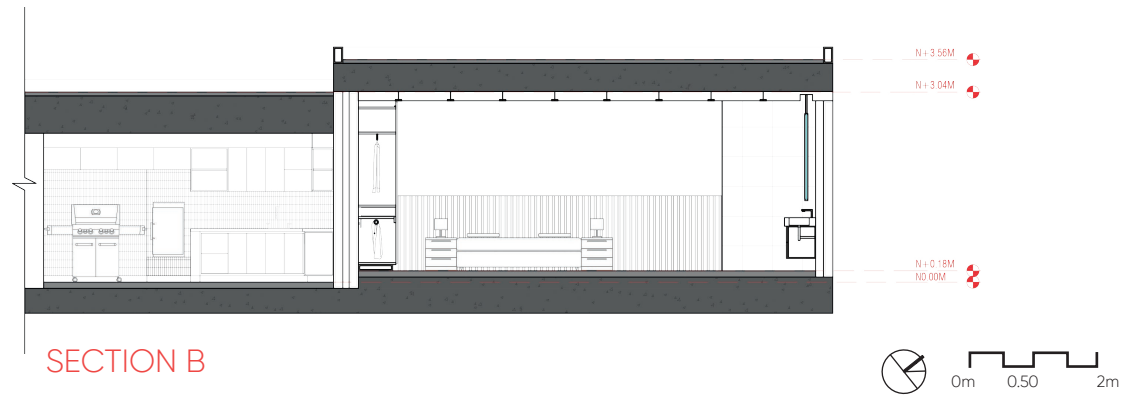

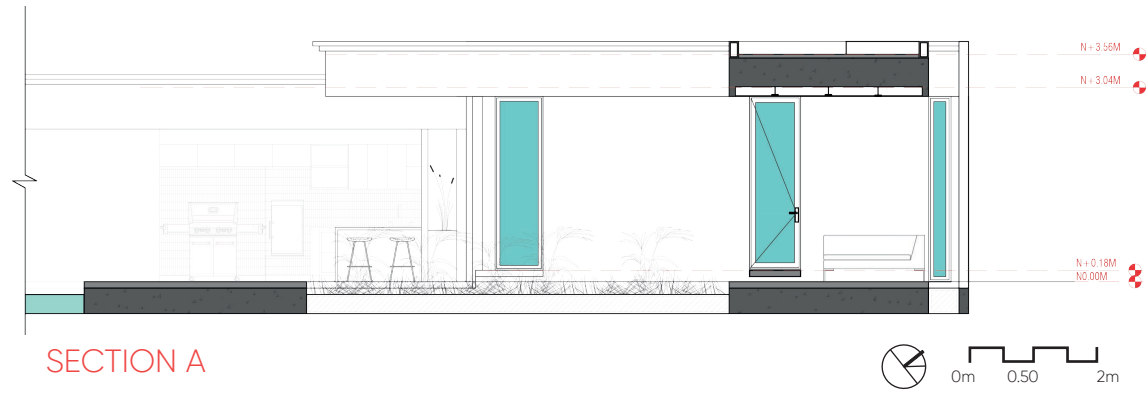

## ARCHITECTURAL PLAN

- 01. BBQ Area
- 02. Bedroom
- 03. Bathroom
- 04. Social Terrace

The project involved transforming an old laundry area into a BBQ space for social gatherings. Additionally, an external bedroom and a private-use terrace were designed and built. The focus was on achieving a modern design that harmoniously integrates with the architectural style of the main house.

## ACACIAS HOUSE

**Project Type** | Residencial

**Location** | Ocaña, Norte de Santander

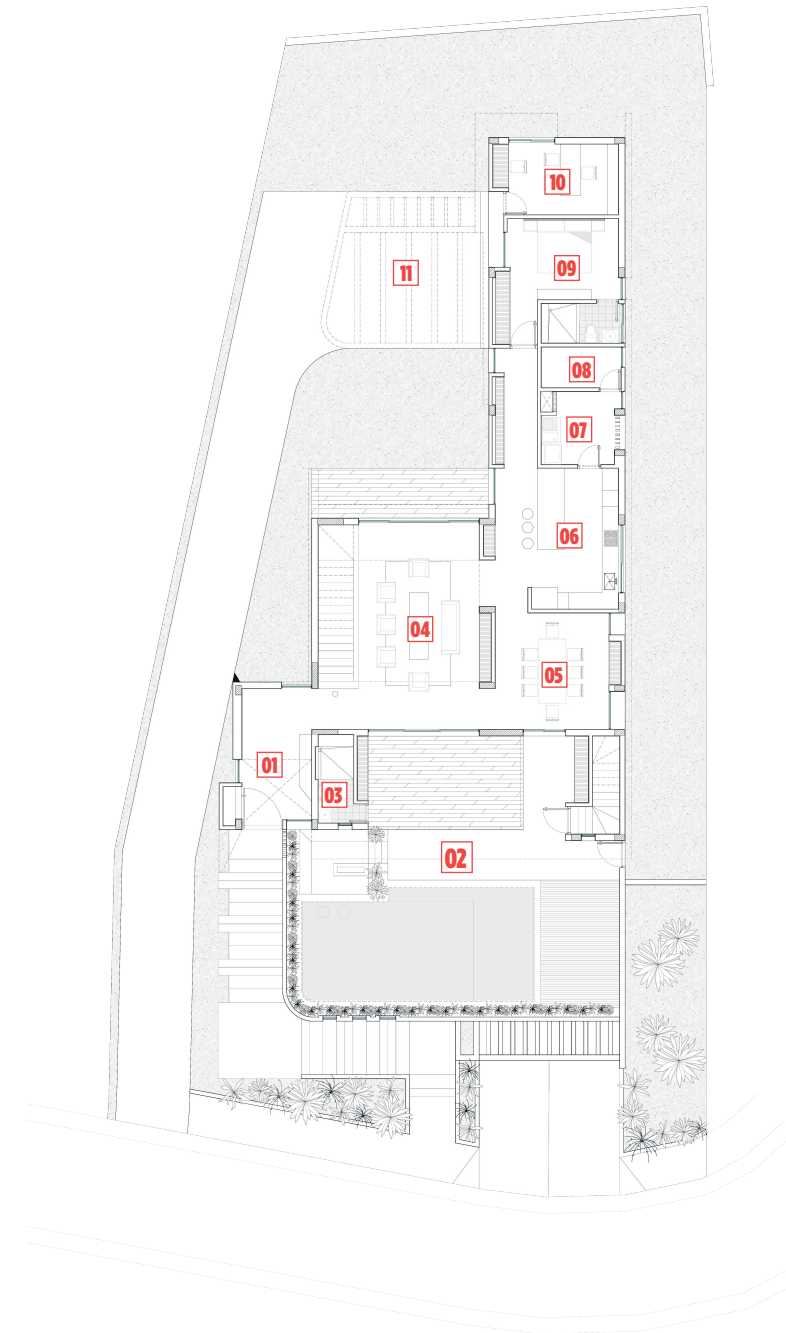

**Scope:** The design process for this project lasted two months, carried out in collaboration with architect Sebastián Escalante. My responsibilities included: 3D modeling of the project, drafting architectural plans, interior and exterior spatial arrangements, rendering and presenting the project

## ARCHITECTURAL PLAN

### First Floor

This residential project is located on a sloped site, which allowed for a distribution across three levels: a basement dedicated to services and storage, a first floor housing the common areas, and a second floor dedicated to private spaces.

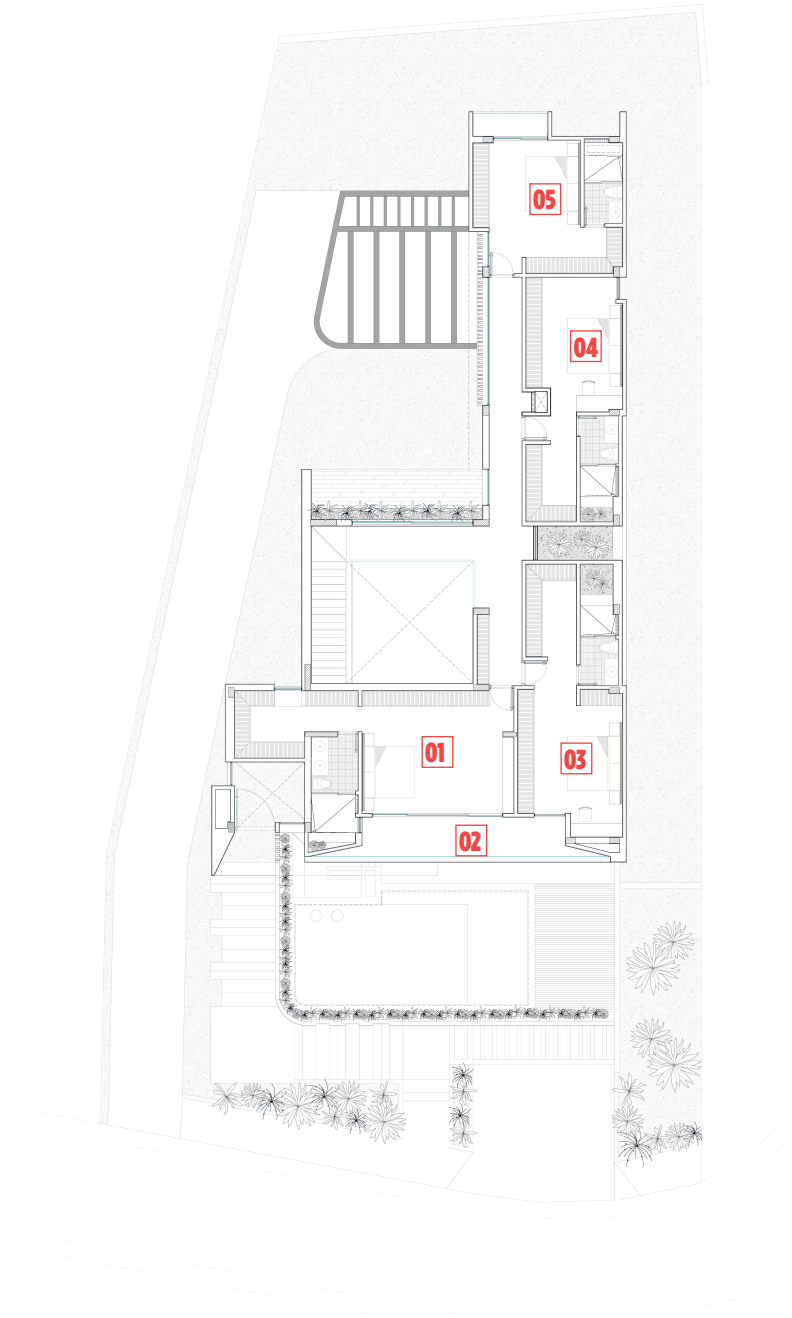

The design aimed to create a modern home that stood out for its spatial flow, maximizing natural light intake and taking advantage of the strategic location to frame views of the nearby lake. A harmonious transition between the different spaces was a priority, achieving a visual and functional connection that integrates with the surrounding environment.
