Year : 2020
Site : Ubud, Bali
Instructor :
Team :

Ubud brings the nature elements that mostly attract tourism with a strong and rich culture and stunning panoramas give us a challenge on designing where clients need are the luxurious concept to blend in with the nature.

Main things that we keep on designing a luxurious villas concept to put on the landscape of 45°-60° slopping, consist of 16 villas with 3 types of villas and communal space and having an incredible view for each villa with feel of comfort and privacy in maintain.

AXONOMETRIC

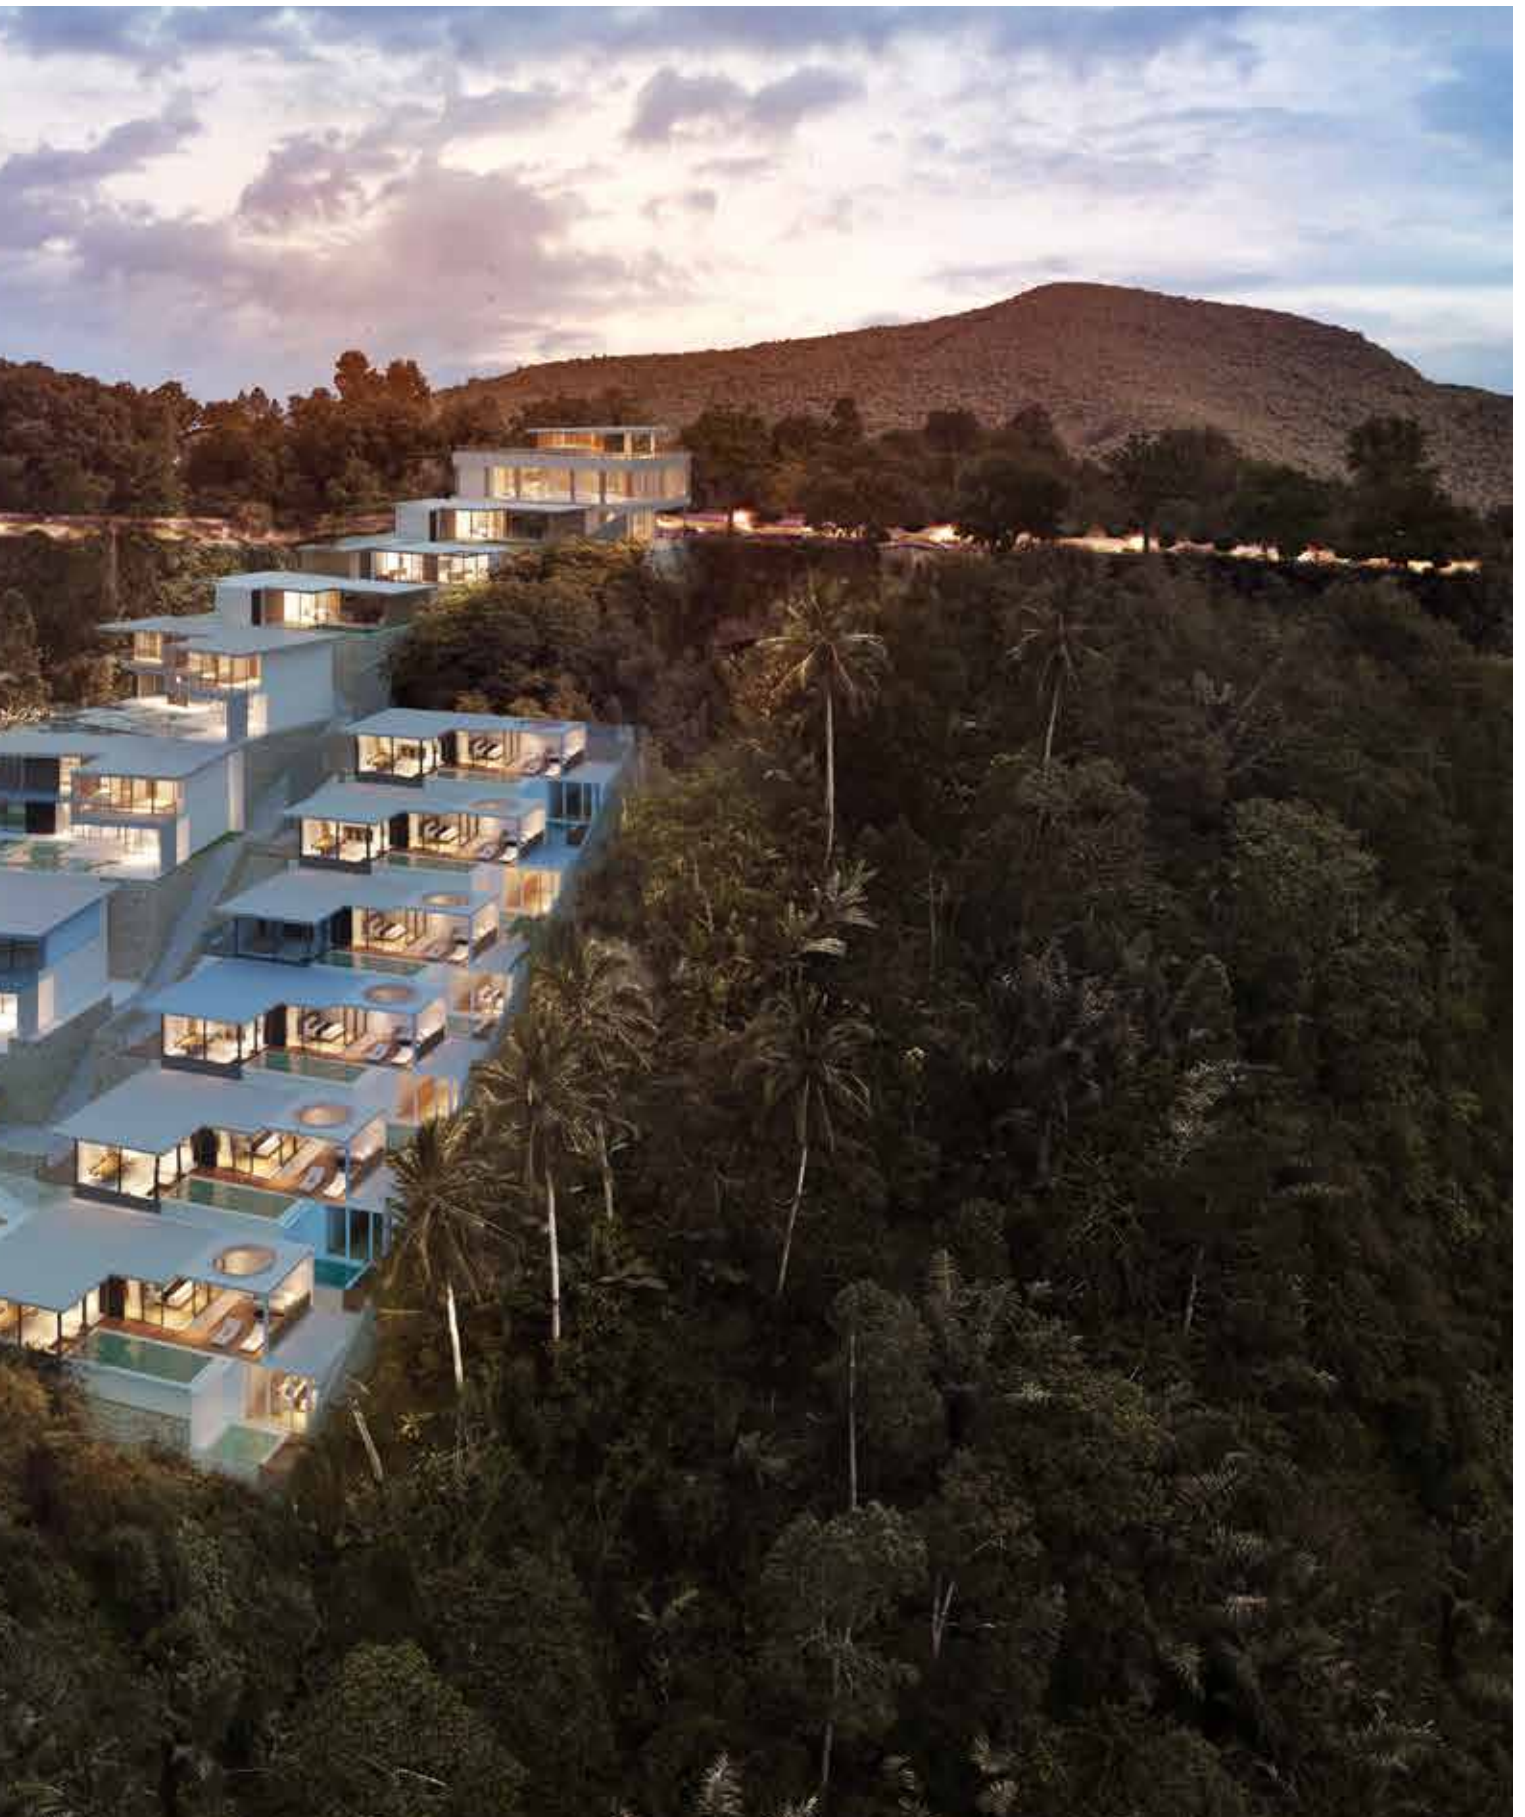

MASTERPLAN

We design each details of villas that provide pool and the view. Every villa have it's own privacy and with full sliding windows provide fresh air into the villa circulations air.

With a comfortable size and confort with final touch up of simplicity materials bring the luxurious in the room.

This room is suitable for the type of visitor that's going on a trip with friends. It is facility is the same as 1 bedroom, but the difference is just that it has 2 bedrooms to use. It is the middle option for visitors that want to use space that's not too small nor too spacious.

From this type, the visitor can enjoy the tropical view, nature air, and cool - air from their large balcony. The visitor can also enjoy it while swimming or relaxing in the jacuzzi as it is located facing exactly to the trees that were a magnificent tropical view.

02 Green Moon Villa

Year : 2020
Site : Canggu, Bali
Instructor :
Team :

Project located on a high residential complex and designing four bedroom villas of two unit villas in a small land is a challenge on this project. Clients with a budget of building we have to design a comfort and simple villa to make it rich in compact and contemporary design.

AXONOMETRIC

We design villas with 1 unit facade with a separate entrance. The concept to make clients feel the villas feel bigger inside.

We design the entrance facing living room and the pool with indoor feeling blended with the outdoor. Comfort and bigger circulation inside will make the villa feel more space.

03 Balangan

Year : 2021
Site : Uluwatu, Bali
Instructor :
Team :

Project located 100m from the beach. The cliff surrounded with huge and luxurious villas with the high-end. Client needs on build with a high building to have a view of the sea, with a small land we have to design 2 villas with three bedrooms and four floors. As Bali has a building height regulation, we designed the fourth floor as the sunbed roof area where clients can enjoy the view with sun time.

AXONOMETRIC

As the villa facing the view and full glass on the cliff with a high temperature during afternoon time, the sun hit inside, we design wood sliding panel where we minimize sun shading through the room, as client need.

04 Setter Coworking

Commercial project

Year : 2021
Site : Canggu, Bali
Instructor :
Team :

Commercial building on the most crowded area in canggu and we provide clients preliminary design of commercial building to attract customer on investing on this project.

Commercial building with coworking space on the second and third floor needs to be covered and privacy away from the traffic.

So we design with a cutted facade where customer can enjoyed the sunset.

05 SWOI New Project

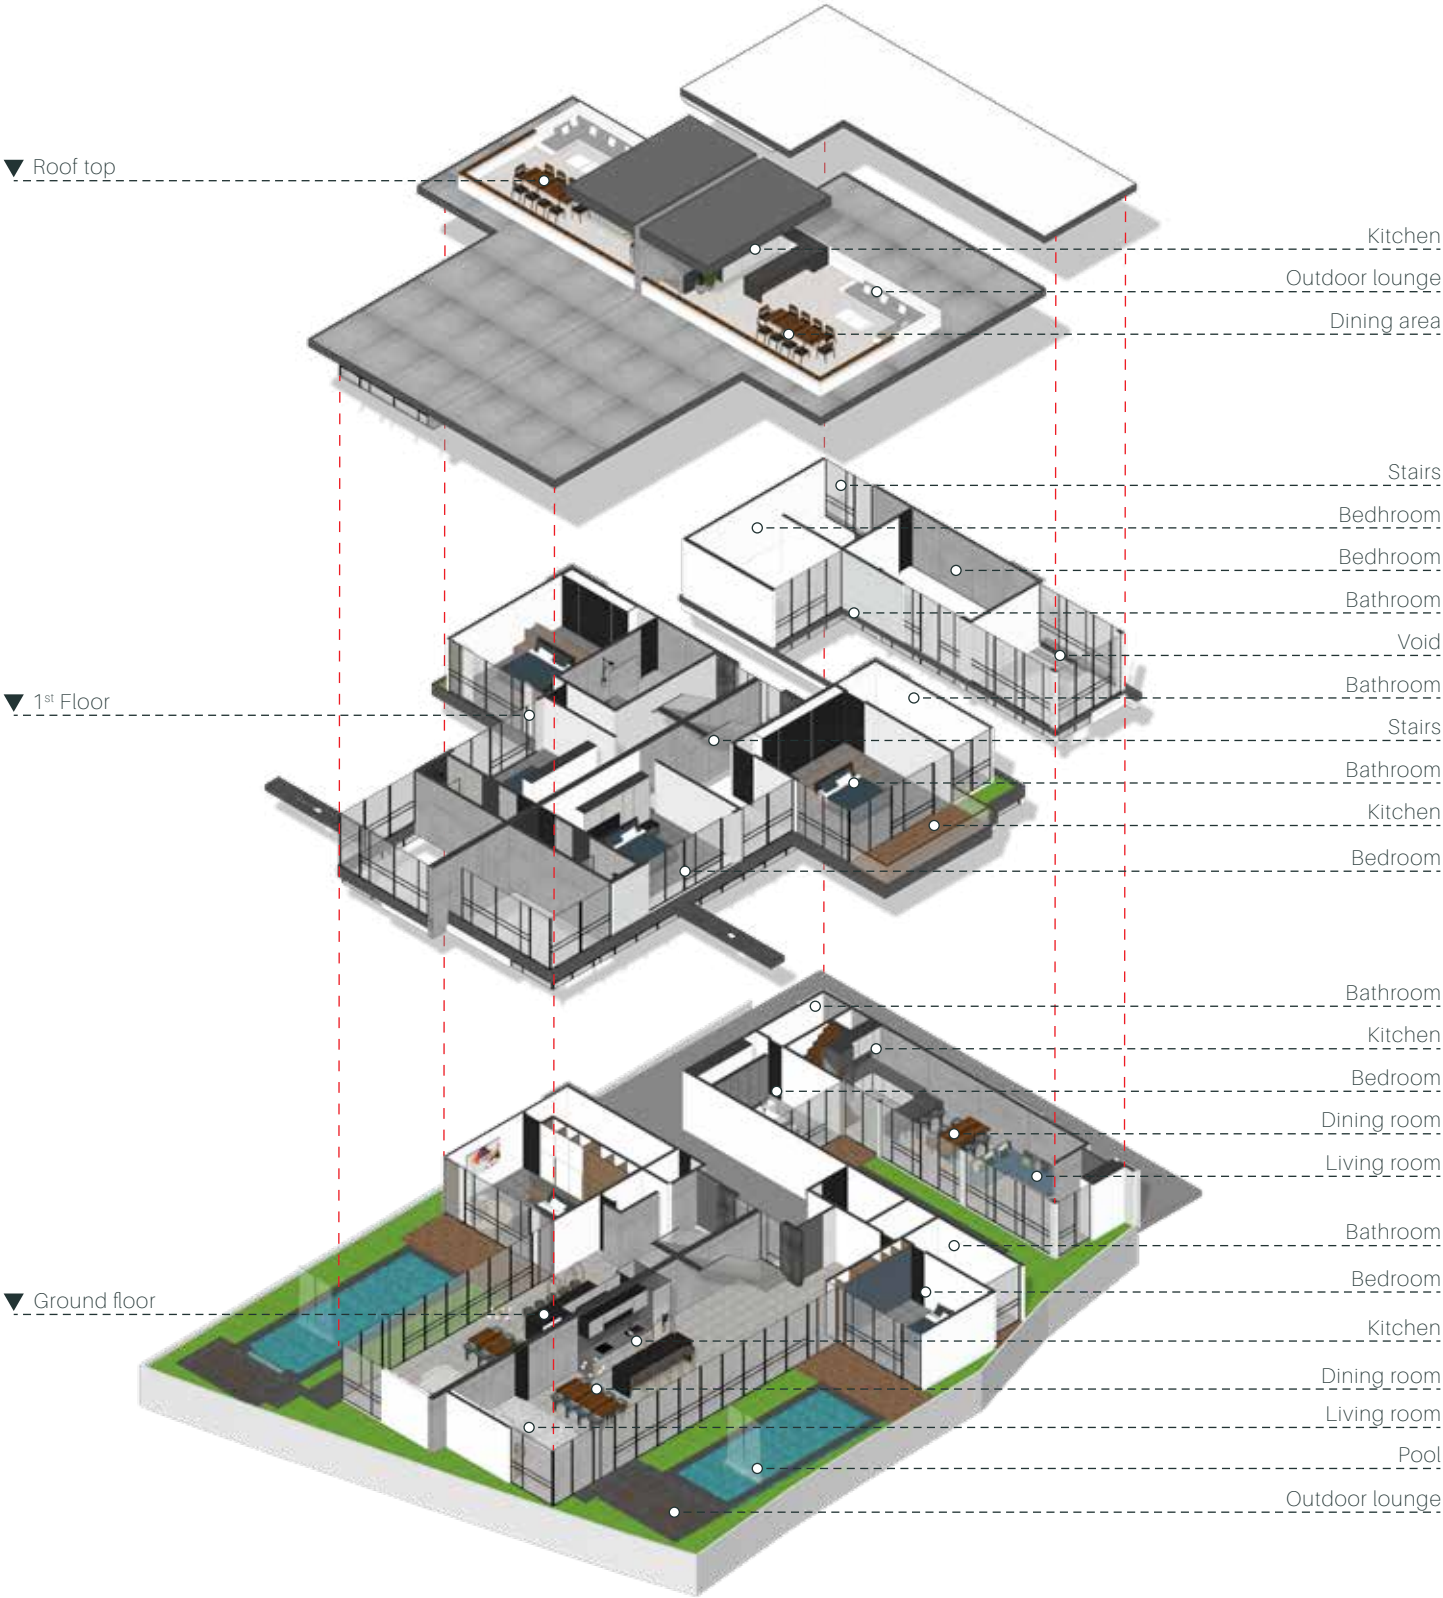

Year : 2021
Site : Canggu, Bali
Instructor :
Team :

A luxurious project concept as the client want to mhave a huge villa that each corner of the villa can see through the pool area with a long nice kitchen and tidy from the entrance bring the client into a feel of home.

We bring along the corner as the end where the living room located to have all the view through the outdoor.

AXONOMETRIC

Design villa with a full glass around will bring clients on seeing the panoramic view in this villa. With a big space circulation as one of the sense of contemporary and picking dark stone as a strong material sense in this villa.

06 CASA LUNA

Year : 2022
Site : Ubud, Bali
Instructor :
Team :

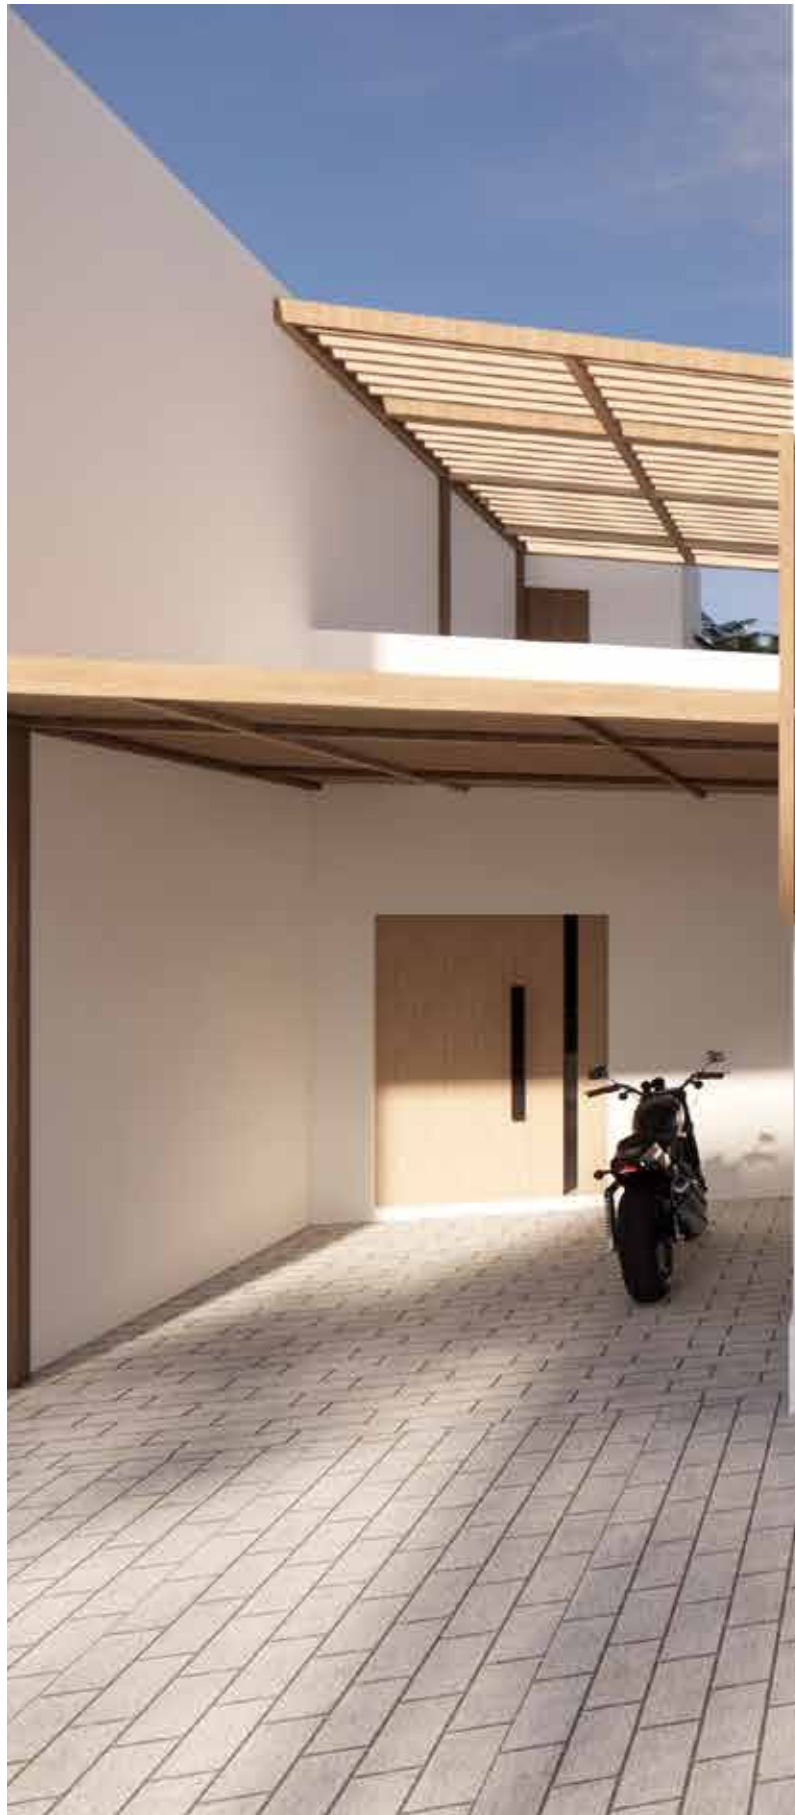

Casa Luna is one of renovating project, client brought a ready villa and want to renovate this villa into a new look that they want to have minimalism and selected material of wood.

AXONOMETRIC

Casa Luna we renovate into a new look of nice natural wood colors and adding room with pergola rooftop, closing and separating the indoor and outdoor, and rooftop adding more space of outdoor space that makes the space more and comfort.
