MOHAMMED ASIM KHAN

Ph: 054 574 0801 | Em: mdasimkhan@live.com | Add: Al Khobar, KSA

Highly motivated and results-oriented architect with 6+ years of experience in residential and commercial design. Proven ability to lead and manage projects from conception to completion, exceeding client expectations and delivering high-quality results. Passionate about sustainable design and creating innovative solutions that enhance the lives of those who use them.

EXPERIENCE

FOUNDER AND PRINCIPAL ARCHITECT

A2I Studios | Hyderabad, India

Apr 2020 – present

- Established and manage a successful architecture firm specializing in residential and commercial design.
- Lead a team of 9 architects and engineers in designing and supervising construction of 3 million sq. ft of diverse built spaces, including homes, apartments, complexes, and gated developments.
- Mentored junior team members, fostering their professional development and contributing to a positive and collaborative work environment.
- Collaborated with clients to understand their needs and develop creative solutions that met both their aesthetic and functional requirements.
- Oversaw all aspects of the design process, from initial sketches to construction documentation and project management.
- Managed budgets and timelines effectively, ensuring projects were completed on time and within budget.
- Honored by ELDROK India Architecture Awards 2022 for 'Excellence in High End Home Architecture & Consulting'.

DESIGN PARTNER

Livspace | Hyderabad, India

Sep 2018 – Mar 2020

- Planned and budgeted modular kitchens and wardrobes according to client requirements for 10+ projects.
- Conducted on-site consultations and measurements to ensure accurate designs.
- Liaised with clients throughout the project to address their concerns and ensure satisfaction.
- Collaborated with production and installation teams to ensure smooth execution of projects.

SENIOR ARCHITECT

Locus Design Studio | Hyderabad, India

Jan 2018 – Dec 2019

- Joined as an Architect and promoted to Senior Architect within 2 years of service.
- Handled over 50 local and international projects, overseeing the entire design process from concept to delivery.
- Managed a team of interns and junior architects, providing guidance and mentorship.
- Implemented effective communication strategies to ensure clear understanding between team members and clients.
- Utilized digital tools and software to create high-quality design presentations and documentation.
- Continued to collaborate with the firm on select projects after transitioning to A2I Studios.

INTERN ARCHITECT

GS Studio Design Consultants

Jan 2017 – May 2017

Sandhya Architects and Interior Designers

Sep 2016 – Jan 2017

SKILLS

- Architectural Design: Conceptual design, detailed design, construction documentation, 3D modelling and rendering.
- Project Management: Budgeting, scheduling, team leadership, communication, client relationship management.
- Sustainable Design: Green building principles, eco-friendly materials, and technologies.
- Soft Skills: Excellent communication, interpersonal, and collaboration skills, leadership, time management, problem-solving.

COMPETITIONS

Unbox Competition - 2018

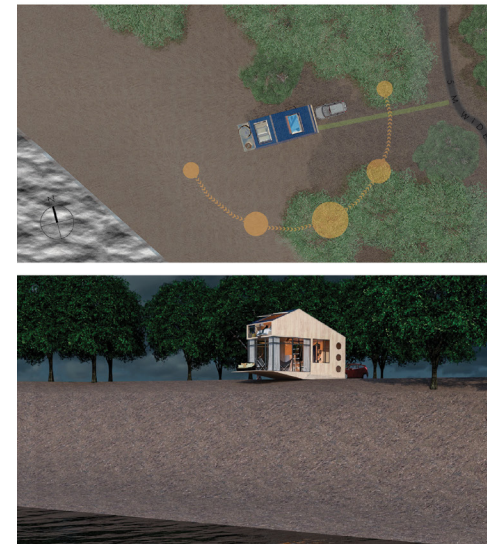

01

OFF THE GRID

YET CLOSE TO THE HEART

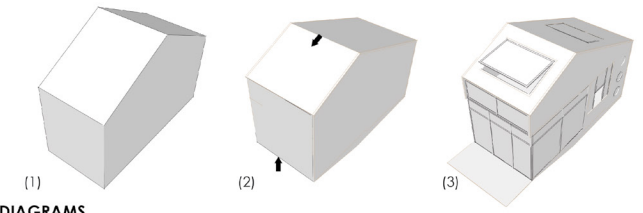

In a bustling city like Hyderabad with rising the population and prices, we often want to get away from the crowd and the hassle of work to refresh ourselves. We like to get away from the pollution and busy schedule, at least once a month, if not a week. But what if we could do it every day? What if we could refresh ourselves each night being at home? Our concept gives exactly that opportunity.

SITE
We chose a site with a view at Gandipet, which is away from the crowd but close enough to work. The house overlooks the Osman Sagar Lake giving a wonderful view to the residents. In the surrounding are lush green trees that provide privacy at the location.

TINY HOUSE DESIGN COMPETITION

PROCESS DIAGRAMS

CLIENT

We chose a couple as our client with the husband being an Architect working in Hitec city, and the wife a lifestyle blogger working from home. Both of them require a calm and peaceful environment for their work and rest, away from the crowd. This gives us an open book understanding to which our concept fits perfectly. The serene surrounding with lush greenery all around provides privacy and beautiful views to calm the minds increasing productive creativity.

CONCEPT

Inspired from tradition, we took the traditional hut house and transformed it to look modern and minimal for the tiny home. We divided the simple rectangular space using levels, incorporating the requirements within the structure by taking the bedroom at a mezzanine level and the rest on the lower level. The orientation on the site is East-West with the West side having maximum openings to allow calm sunset light and the cool breeze in and beautiful views of the lake.

02

TINY HOUSE DESIGN COMPETITION

VZTH8932

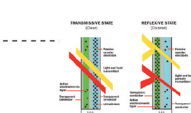

MATERIALS & SUSTAINABILITY

The entire structure is made out of Timber wood with UPVC window frames for the openings. The structure is supported by metal cables into the ground from the top.

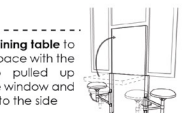

Tesla Solar Roof tiles of smooth finish combined with Powerwall battery for uninterrupted power to the house

Timber wood planks used for the construction of the entire house that provide strength and are sustainable and efficient

Skylights with electrochromic smart glass that turns dark in the presence of harsh sunlight

Foldable dining table to increase space with the table top pulled up closing the window and the chairs to the side

Pipe from the roof to collect rain water that passes through filtration under the living and to the water storage under the kitchen and toilet

Foldable sitout platform to use as needed for a better view and feel of the surrounding
