WALNUT CLAD RESIDENCE

Cincinnati, Ohio
Jose Garcia Design
Renovation & Addition
8,000 Square Feet
$5,000,000 Budget

Working under Jose Garcia, I contributed to the architecture and interior detailing of this residence, with a focus on construction documents, custom millwork, kitchens, and baths. The design balances modern clarity with warmth, using natural light and a restrained material palette to create a cohesive and highly crafted interior environment. The project was developed in close collaboration with Nate Berkus Interiors, allowing architecture, interiors, and furnishings to come together as a unified whole.

Natural light was used as an organizing element throughout the home, with skylights defining circulation and key interior moments while bringing daylight deep into the plan. A warm, restrained material palette of wood finishes and natural stone reinforces a sense of continuity, craftsmanship, and quiet luxury.

Modern New Build

6,500 Square Feet

$3,750,000 Budget

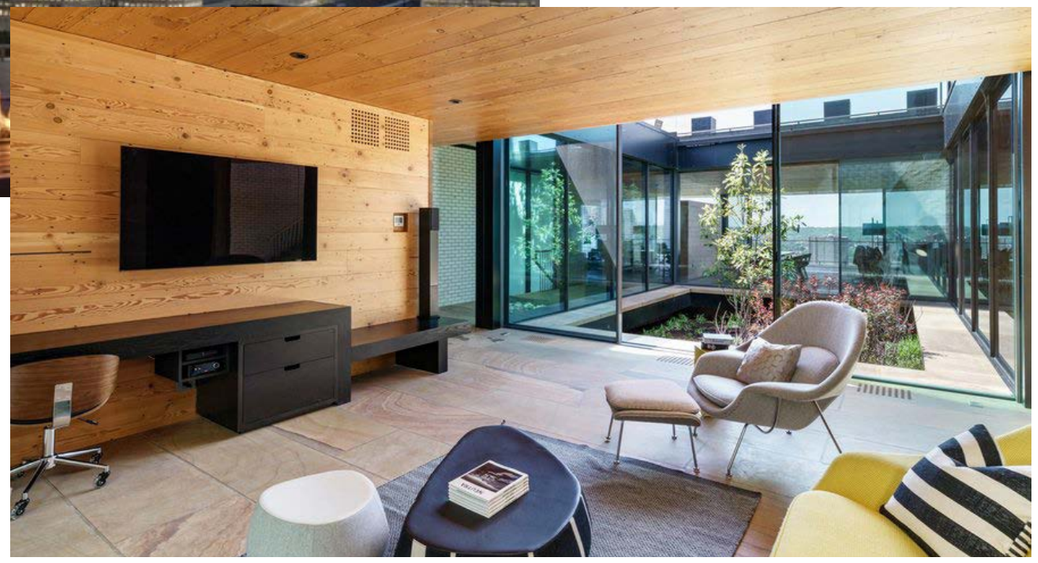

This ground-up residential project began with the opportunity to reimagine a site with exceptional views, resulting in a modern home designed from the foundation up. The architecture and interiors balance clean lines with warmth, using a restrained palette of natural materials to create a grounded, livable environment. Developed within a design-build framework, the project reflects a close relationship between concept, detailing, and execution.

The exterior combines brick and timber to create a modern yet grounded presence, while the interiors are wrapped in natural wood finishes that add warmth and texture throughout the home. The palette was intentionally restrained to emphasize material honesty and a sense of continuity between inside and out.

I led the design of the custom casework and contributed to furnishings, space planning, and construction documentation. Working within a design-build framework allowed for regular on-site involvement and a close connection between design intent and execution.

OLD WORLD, NEW HERITAGE

The Village of Indian Hill, Ohio

Evolo Design

New Build - Estate Level Residence

12,000 Square Feet

$8,000,000 Budget

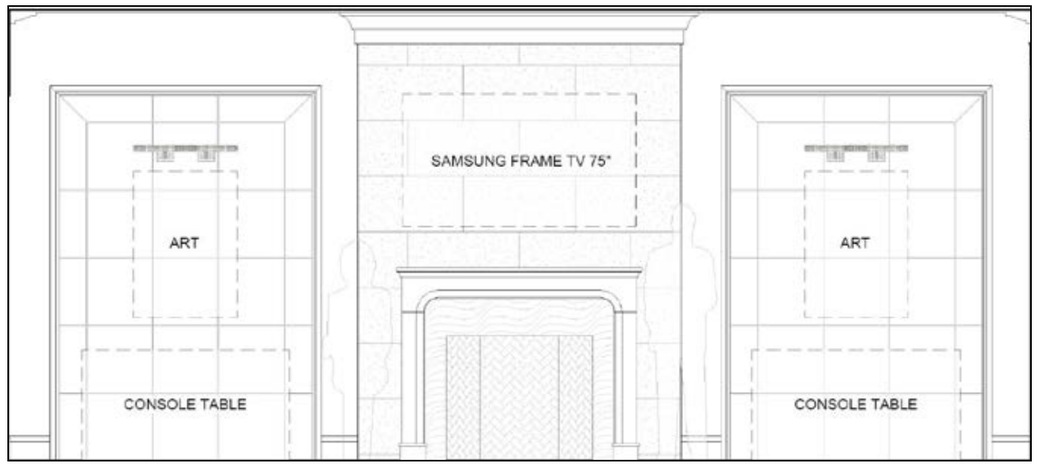

This project involved reworking plans for a new-build residence to elevate both the architectural clarity and interior character of the home. The layout and detailing were redesigned to improve proportion, symmetry, and spatial flow while introducing a more refined and cohesive design language throughout. The result is a layered, timeless interior that blends classic architectural elements with a sense of warmth and livability.

The layout was comprehensively reworked to improve sightlines, balance, and spatial symmetry while introducing layered architectural elements throughout the home. Vaulted forms and interior architecture create rhythm, hierarchy, and a stronger sense of permanence from space to space.

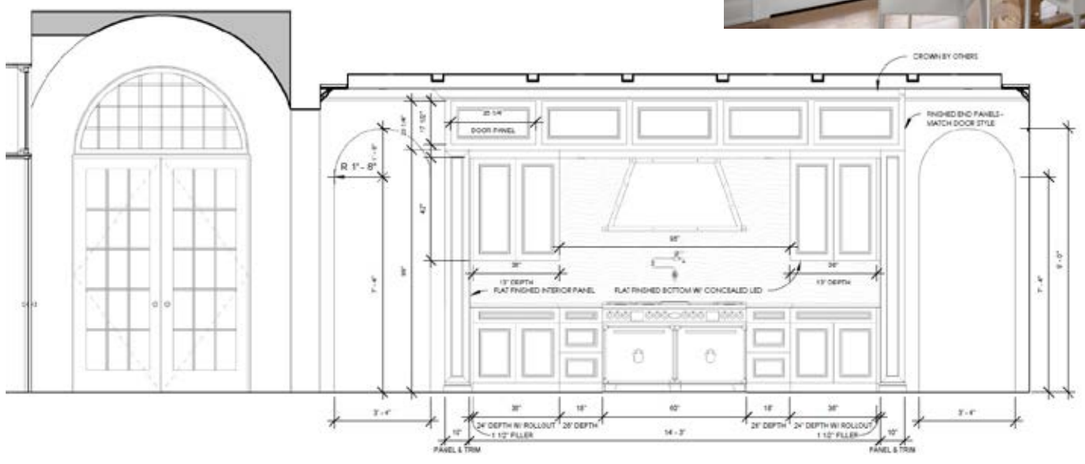

A refined mix of natural materials and artisanal finishes brings warmth and depth to the interiors. Custom millwork, stone surfaces, and textured wall treatments are layered with sculptural details to create a home that feels timeless, tailored, and richly onsidered.

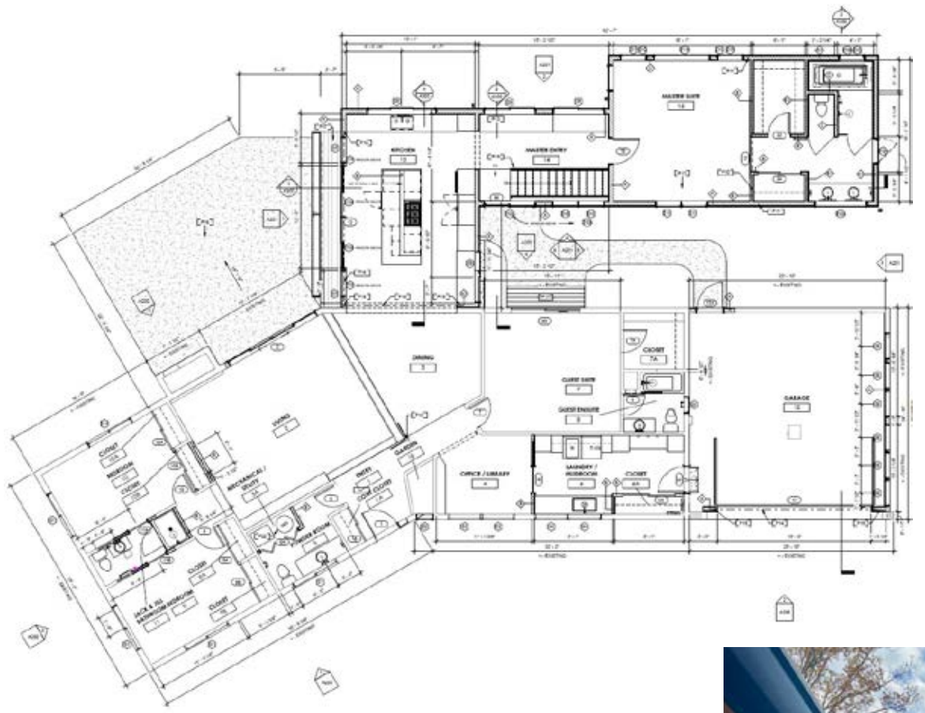

MID-MOD ADDITION

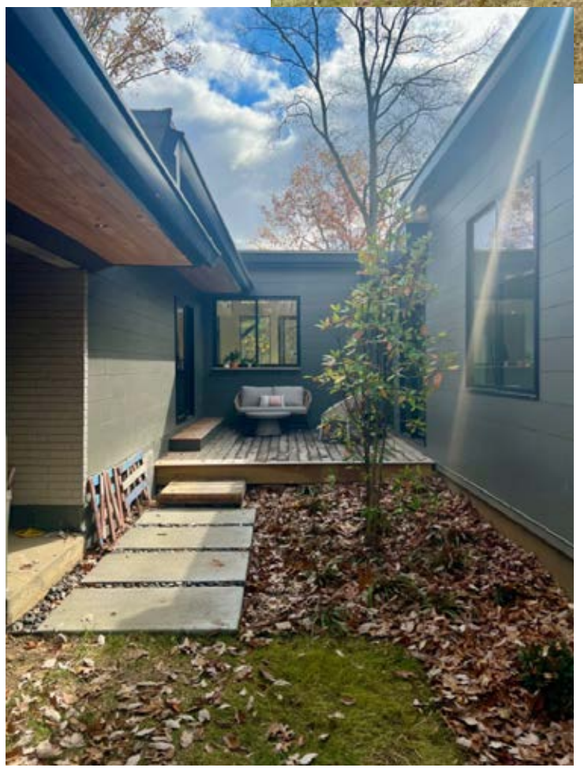

The Village of Indian Hill, Ohio
Wood Architects
Full Gut & Addition
3,750 Square Feet
$2,750,000 Budget

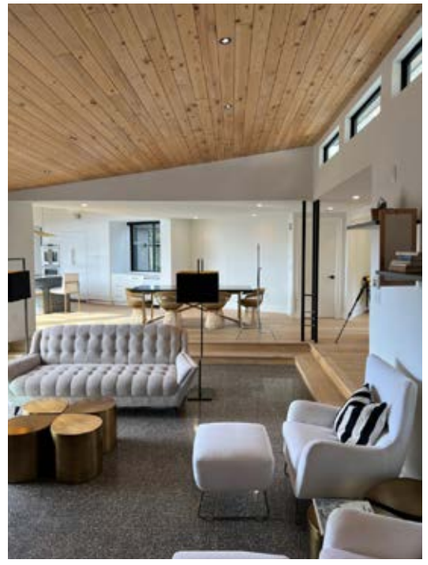

This midcentury residence was thoughtfully expanded to better support modern living while preserving the integrity of the original architecture. A carefully integrated addition enhances the home's functionality and spatial flow, creating a strong dialogue between existing and new elements. The result is a cohesive renovation that balances respect for the home's midcentury character with a fresh, livable approach to space and materiality.

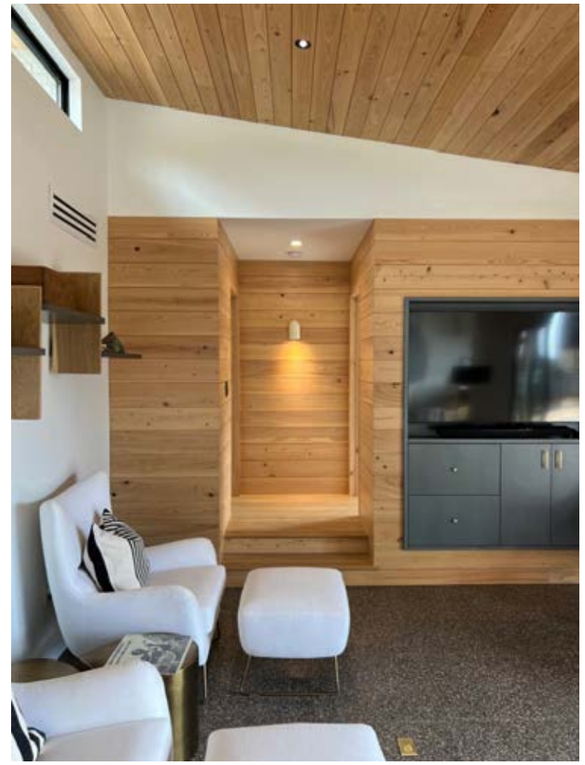

An offset addition was designed to expand the home's footprint while preserving its original scale, forming a courtyard between old and new volumes.
The kitchen acts as a central hinge, with a long circulation spine connecting the existing house to the new primary suite and framing views through the site.

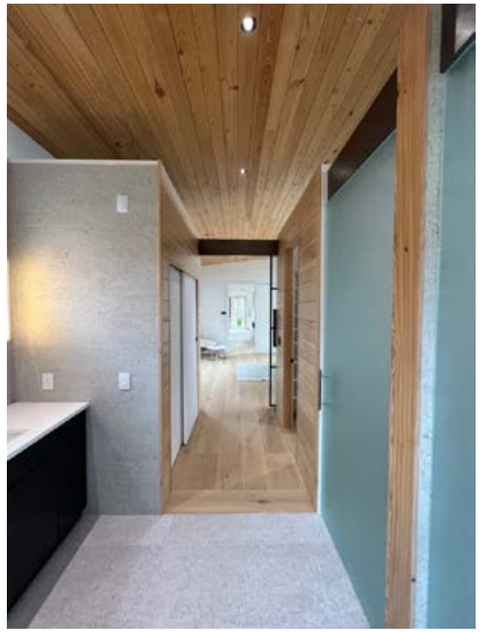

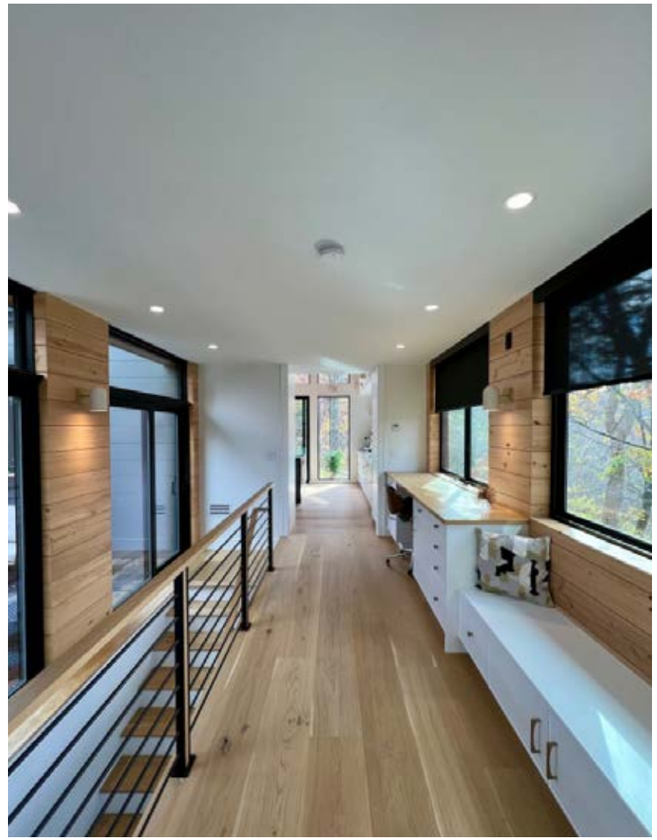

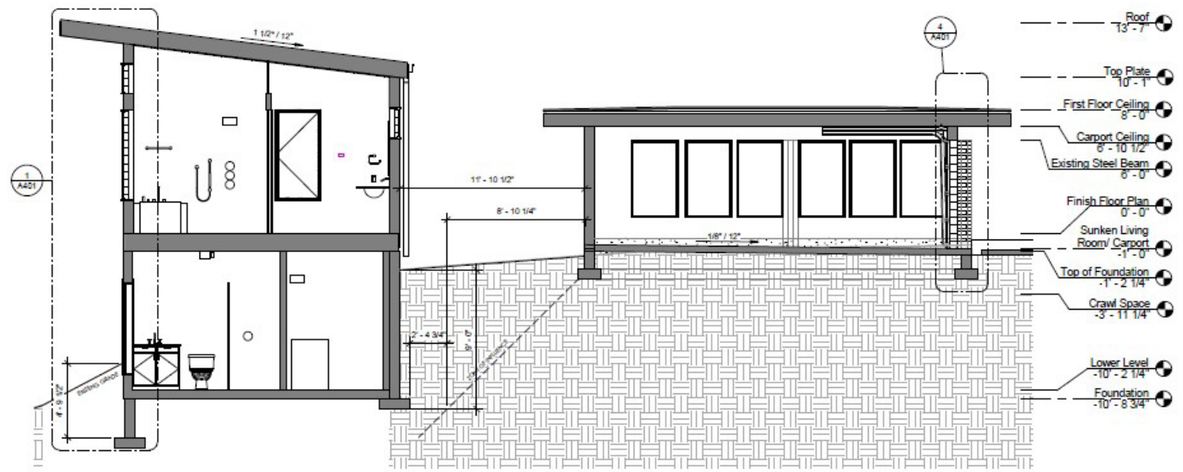

The renovation carefully reinterprets the home's midcentury roots through a restrained palette of terrazzo, walnut, cork, and unlacquered brass. The house was rebuilt from the studs out, allowing new spaces and finishes to feel both contemporary and deeply aligned with the original architectural intent.

DISCOTHÈQUE

Over The Rhine, Cincinnati, Ohio

Freelance

LGBTQ+ Bar & Lounge

7,500 Square Feet

$1,750,000 Budget

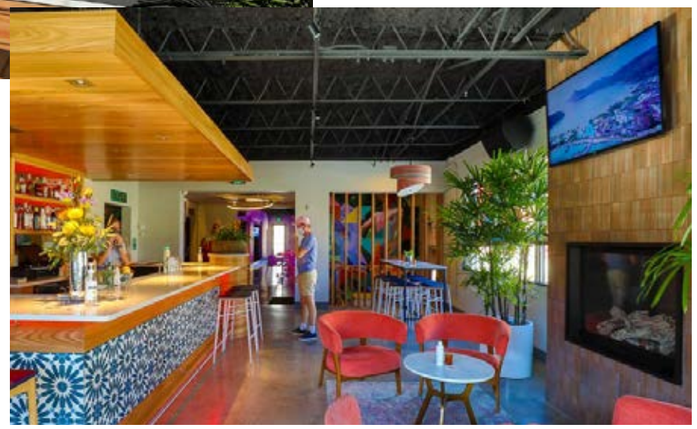

E19 is an upscale LGBTQ+ nightlife lounge designed to bridge the gap between casual neighborhood bars and high-energy clubs. The space blends a vibrant, international sensibility with a relaxed, welcoming atmosphere suited for both lively nights and everyday gathering. The result is a warm, modern environment that feels elevated, inclusive, and celebratory without taking itself too seriously.

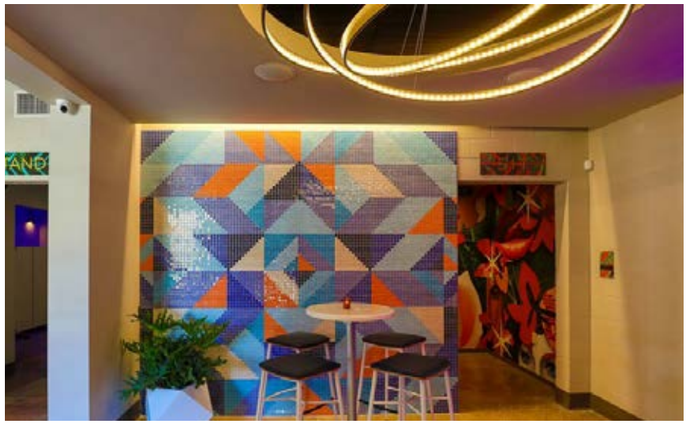

Working closely with the owners, I served as interior designer & architectural consultant, helping shape the overall concept while developing the materials, furnishings, & spatial layout. The bar and lounge areas were carefully designed to balance energy & comfort, creating a space that feels both social & relaxed.

MID-CENTURY MAXIMALISM

Palm Springs, California

Personal Concept

Historic Preservation + Guest House

3,200 Square Feet

Budget: Unknown

This self-initiated project explores the historic preservation and renovation of Richard Neutra's Miller House in Palm Springs, California. The existing midcentury residence is carefully restored and reinterpreted, while a new carport and pool house expand the home's living spaces and functionality. Together, the old and new are designed to balance respect for Neutra's architectural principles with a more expressive, maximalist design approach.

The study focuses on the Miller House's small footprint, proposing a new pool house & carport to add living space and modern functionality without overpowering the original structure. Interior updates draw from Neutra's material vocabulary—walnut, stainless steel, and daylight—while introducing moments of bold pattern to push the project toward a more expressive, contemporary interpretation.

EVAN HUNTER VAN WINKLE
WINTER **2025**

Thank you for taking the time to review my work. I would be happy to share additional imagery, drawings, or full construction documentation upon request. All projects shown were designed by me or developed collaboratively with the firms noted.
