

PORTFOLIO

BUILDING SYSTEMS

SKETCHES

ENCLOSED PARK

These images represent a small sample of the architectural and interior design work created during my years of study at the University of Missouri - Columbia and Washington University in St. Louis.

I wanted to show a variety of skills that have been developed, from sketching, drafting, 3D rendering and model building.

I also wanted to show a variety of projects, from an interior renovation of an existing space, a housing complex, a recreational center and a high rise housing tower.
